

2005 – 2007 – West End Fibre packaging and Amcor Rocklea integration project (\$45 million dollars)

Our job was to provide for all the electrical requirements of this relocation. Working directly under the project engineer, we relocated all of the machines providing new supplies, lighting and power to the new building, Two additional 2000 amp main supplies to the factory and all other electrical work associated with a project of this size. Using our team of sub contractors and hand selected apprentices we were able to successfully complete this project on time and at budget.

2007 – Carton Solutions upgrade

Working directly under the project engineer, we decommissioned, relocated and recommissioned all the machinery involved in this upgrade. This included a new supply to the factory and new cabling for the machinery, including lightening and general power distribution.

2008 – Amcor Fibre packaging Townsville upgrade (\$10 million)

Working directly under the project engineer, we manufactured and installed a number of electrical control cabinets for conveyor systems, wax and starch management and general distribution.

2008 – Supply and install 7 control cabinets for dust extraction filtration system for Fab Fit specifications.**2008 – Amcor Rocklea lanyard safety project**

Manufacture 10 lanyard safety cabinets and install as per customer specification.

2008 – Amcor Rocklea Ward 1 main PLC relocation

Relocate main PLC and associated servo drives and switch gear to a new electrical cabinet away from the machine as specified by the customer.

2008 – Design, manufacture and install new panel and gear for new conveyor system for wax boxes.**2009 – Present**

Over and above the larger projects we have provided on going maintenance and technical support to all our customers ranging from day to day maintenance to large capex jobs involving machine upgrades, conveyor relocations. Testing and tagging store and asset labeling to all our customers.

2009 – Carton Solutions upgrade

Relocation of machinery from Quadpack site to Carton Solutions. Safety upgrade on machines with new panels, engraved labels and commission.
