Introduction

Our comprehensive catalogue contains latest range of our products. We constantly update our catalogue with newly developed products. To order Polmex product please visit our site at www.polmex.com.au

About Polmex:

Polmex[®] is a Western Australian family owned and operated Engineering Company based in Perth. We are an Australian-registered business, with ABN: 68 443 940 751 and our company name is a registered trade mark, registration number 1268758.

We've been established in 1999 for the purpose of engineering design and manufacture and since 2008 we've been trading on line. You can buy from us in confidence knowing that you are dealing with a real Australian business. We've been recognized by our clients as a business committed to providing the best possible quality product/service with ever growing outstanding feedbacks.

Please visit our feedback page at <http://www.polmex.com.au/feedback.html> for client reviews.

Polmex company Competencies:

Technical expertise: We develop product innovations concentrating on required functionality and technical performance. In 2008 Polmex Chief Engineer and Commodore enthusiast came up with a brilliant idea on how to repair his own worn remote control key. Equipped with years of experience in die designing, tool making and vast knowledge of plastic processing he designed first ever Silicone Repair Buttons for Holden Commodore remote key.

Since introducing to the market in mid 2008 Silicone Replacement Buttons for Holden Commodore, due to public demand Polmex team of highly experienced and qualified engineers specialising in their own fields designed and manufactured more repair buttons for remote controls. Today our fantastic products, born from the need are delivering the most economical solution to repair worn remotes.

We are able to deliver a breadth of services from design through tooling to manufacturing, leading to the delivery of the finest product.

Cost Savings: We deliver the best cost effective solution to repair remote controls with worn key buttons. Cost of our Silicone buttons and pads are only a tiny fraction of the final price of a new remote and programming.

Responsiveness: We provide each customer with real time solution. We constantly improve our data and information and make it easy for our customers to deal with us.

Commitment: We are committed to delivering high level of customer service & high quality product at affordable prices. We endeavor to set high standards in design, production & distribution of our products.

Reliability: We continuously improve our processes and services to deliver reliable products, easy to install and to maintain.

Polmex Quality Silicone products:

Our product is 100% Australian Made from the point of inventing through to designing, toolmaking and manufacturing process. Our products are made from High Quality Silicone, which offers excellent flexibility and weather resistance. Silicone we use out performs other non flexible, age and weather deteriorating elastomers used in automotive industry, in particular in key pads of remote controls.

Performance:

Superior properties of Polmex Silicone Buttons/Pads, in comparison with buttons made from other elastomers used in automotive industry:

- High- and low-temperature stability and compression resistance
- Flexibility
- Returns to original shape
- Tear strength and Long-term tensile strength
- Chemical resistant
- Weathering and aging resistance
- Ozone and oxidation resistance

Outstanding properties of Silicone made it our obvious choice of material, to manufacture Polmex repair buttons for worn remote controls, delivering flexible, age and weather resistant product.

Product Range:

| | | |
|------------|--------------|---------------|
| - Audi | - Kia | - Range Rover |
| - BMW | - Land Rover | - Rover |
| - Chrysler | - Lexus | - Suzuki |
| - Daewoo | - Mazda | - SAAB |
| - Ford | - Mercedes | - Subaru |
| - Holden | - MG | - Toyota |
| - Hyundai | - Mitsubishi | - Vauxhall |
| - Jaguar | - Nissan | - Volkswagen |
| - Isuzu | - Opel | - Voyager |
| - Jeep | - Peugeot | - |
| - | | |

Product Colour and Inscriptions:

All of our buttons are in Black colour. Silicone is a low surface energy polymer with low adhesion or "stickiness" therefore we use embedded silicone icons instead of painted symbols. Painted symbols will peel off after period of time.

Replacement Instructions:

For convenience of our customers all of our products come with replacement instructions. Instructions are in pdf format and are located on our website at <http://www.polmex.com.au/sitemap.html> available for downloading for personal use only.
