Company Profile:

Scaffolds Australia is a prominent supplier of Scaffolding & Formwork Equipment, with its primary focus to supply our products in Western Australia. We welcome all customers from Individuals to various Scaffolding, Formwork, Construction & Mining Companies.

We have always believed in supply of high quality products which also comply with relevant AS/NZ Standards and are suitable for all companies coming from their different Industries.

Our Product Range:

- K-Stage Scaffolding (Painted)
- Scaffold Tubes (Galvanised)
- Scaffold Fittings (Galvanised)
- Formwork Props (Galvanised)
- Customised Products.

Direct Container Deliveries are available to your Site or Warehouse.

We are able to supply our Customers with K-Stage Scaffolding, Scaffold Fittings, Scaffold Tubes, Formwork Props, Steel Planks & other scaffolding accessories from our yard in Western Australia.

We can also supply you with other scaffolding systems like Cup-Lock Scaffolding, Ring-Lock Scaffolding, A-Frame Scaffolding & Formwork Frames.

We also have in house production facilities which we use to provide our customers with any Customised Products, according to their own specifications.

K-Stage Scaffolding is a type of Modular Scaffolding, where Verticals (called Standards) & Horizontals (called Ledgers) are joined together with a V-Type locking system. Also other products are used to make a stable structure.

We stock all components of K-Stage Scaffolding in Painted finish in our WA Warehouse. We also supply our Customers with Galvanised finish of K-Stage Scaffolding.

With K-Stage Scaffolding system, we can attain heights from 3M to 40M or more.
