

HORIZON POLES

**TRANSFORMING
LANDSCAPES**

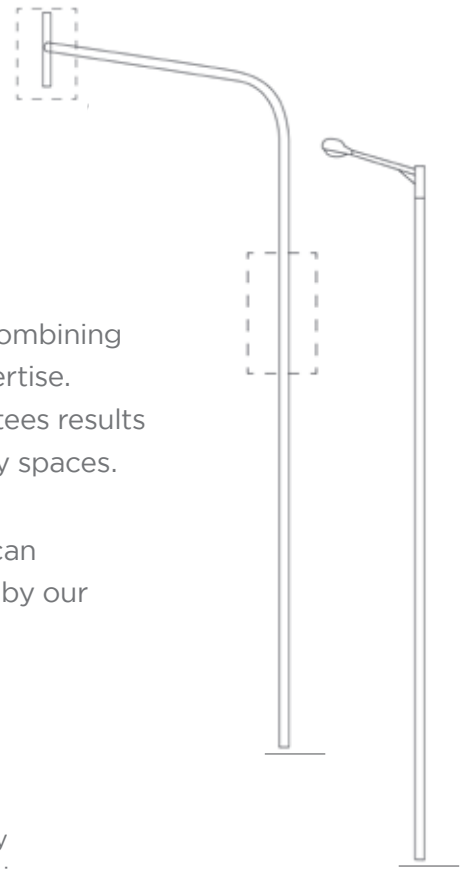

LANDSCAPE LIGHTING INNOVATION

HORIZON POLES is an urban lighting specialist, combining our engineering experience + lighting design expertise. Our unique approach to lighting solutions guarantees results that transform landscapes into inviting community spaces.

Why Us? We have a wide range of products and can customise solutions to your needs. This is backed by our quality service guarantee.

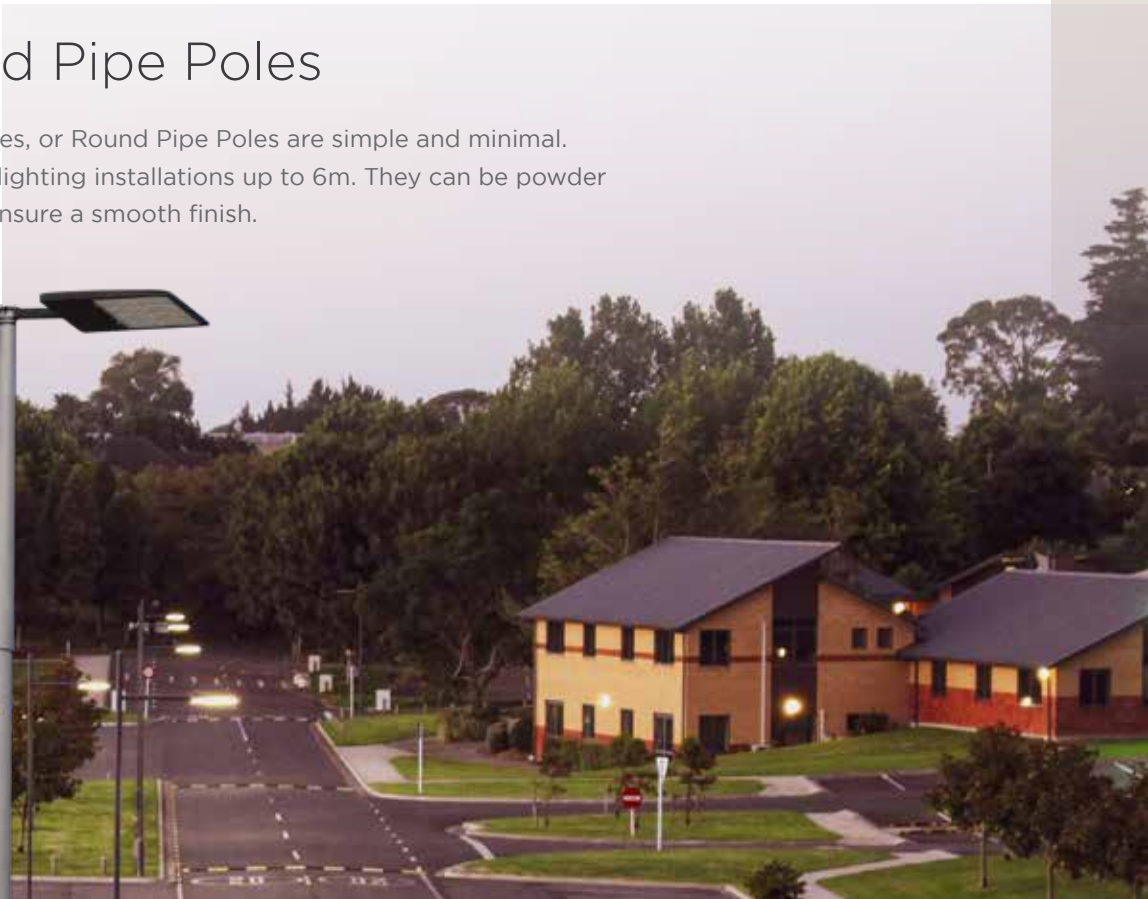

Traffic Signal Poles

Traffic Signal Poles are specifically designed for roadway and intersection requirements to meet council specifications. The range is designed for signal and lighting applications.

Round Pipe Poles

Circular Poles, or Round Pipe Poles are simple and minimal. Perfect for lighting installations up to 6m. They can be powder coated to ensure a smooth finish.

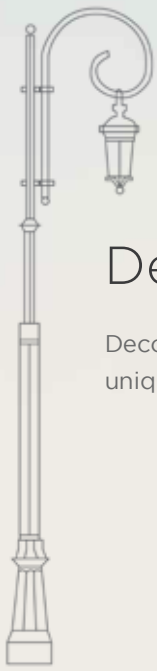

Tapered Octagonal Light Poles

Tapered Octagonal Poles are the most cost-effective poles to manufacture, and, due to their high strength-to-weight ratio, they are the most commonly used poles.

Tapered Round Light Poles

Tapered Round Poles have a modern, architectural appearance, while maintaining the capacity required for a lot of lighting designs. They look very sleek when powder coated.

Decorative Light Poles

Decorative Light Poles are often custom designed, to create a truly unique solution. They include fluted and flange poles. Options up to 8m.

Square Light Poles

Square Poles are modern, sleek and professional. Height ranges from 2m - 8m. They are often used in car parks and urban spaces. Designed to suit a square streetlight.

Mid-Hinge Light Poles

Mid-Hinge Poles are designed for easy maintenance. While not as popular now with LED lights, Mid-Hinge Poles are still used for wind socks, and in places where access is difficult.

QUALITY SERVICE GUARANTEE

HORIZON POLES provide quality products and guarantee exceptional customer service at every stage of the project. All products are certified, ensuring they comply with Australian Standards.
