

About us:

Doctor Maloney graduated with a Bachelor of surgery and Bachelor of Medicine in 1990, and went on to study general surgery at FRACS Fellow of Royal Australasian College of Surgeon) which he completed in 1997. Dr. Maloney always had a great passion for plastic surgery and in year 1995, he decided to join Australasian Academy of Plastic Surgeon, two year later, he joined European Academy of Plastic Surgery. After completing his studies, he went to the UK, and later to the US to train further and gain more experience in Plastic surgery. Dr. Maloney is Double Board Certified by board recognized by American Board of Medical Specialties.

Dr. Maloney's work has been featured in numerous national media outlets, such as ABC News, Sunday Times, and the Morning Show, amongst others. He has also given over 50 lectures and presentations on new techniques in the field of plastic surgery. He is highly skilled with all the latest plastic surgery procedures, including Rapid Recovery Breast Augmentation which is one of the fastest, least painful and least invasive, breast enhancement procedure available. Extensive training, schooling, and experience involving thousands and thousands of satisfied patients over the many years in practice, sets him apart as 1 of the most qualified surgeons in the field of Breast Implants and Plastic Surgery

Doctor Maloney is a nationally recognized specialist in the field of breast implants, and his excellent credentials and many years of plastic surgery experience, work wonders for all his patients. He's a trusted and skilled plastic surgeon who always delivers beautiful results. Dr. Maloney helps his patients achieve their unique needs. Using silicone or saline implants to enhance the size or/and shape of the natural breasts, Dr. Maloney helps his patients achieve the improvements they desire. He strives for the very best version of yourself with minimally invasive surgical and non-surgical procedures, combined with some of the latest laser technologies. With Dr. Maloney, you will get the very best patient care.

Services:

Breast Implants

So many women seek to improve the physical look of their breasts.

This improvement may be achieved by either increasing the size of your breasts with breast implants or enhancing the shape of breasts. Dr. Martin has helped thousands of women in Perth and all around Australia to achieve their desired look of their breasts.

There are different options available that can be applied to achieve your goal depending on your requirements. They include breast implants, breast reductions and breast lifts.

Breast Lift

There are various body changes in women that occur as they grow old.

One such occurrence is the effect of gravity on their breasts.

Furthermore, women who have given birth and breastfed have breasts that tend to sag or lose their shape. To correct this condition, many women go through breast augmentation and use breast implants in place of lost size.

Breast Reduction

Women are created differently, and the shapes and sizes of their breasts also differ. Not every woman is happy with the natural look of her breasts. Some women have very small breasts, and may wish to change their appearance. On the other hand, some women have very large breasts that become a burden to carry around. Dr. Martin can help you reduce your breasts to a comfortable size that your desire. In most cases, women who have large breasts complain about back problems because of the added weight to the upper back. This is the most common reason as to why some women undertake a breast reduction. Some women also undertake a breast reduction so that their breasts are in proportion to the rest of their body.
