

Grab Rails from RBA

Despite their simplicity, grab rails can be deceptively complex for the specifier. RBA's grab rail range is designed to make life easier. All grab rails in our warehouse come with a standard 60mm wall clearance and offer concealed fixings. We offer shower grab rails, toilet grab rails and even grab rails for ambulant installations. Complete 2-wall wraparound grab rails, 90 Degree grab rails, 40 degree grab rails and a massive choice of straight grab rails rounds out our range. All come with easy-to-understand images to assist with both design and installation. In addition, our grab rail stock is bursting at the seams.

Make life easier – select from RBA's grab rail range.
