

Sometimes hearing from others is a great way to find out about a product or service. Here's what some of our customers have to say about Gutter-Vac:

"I was so impressed how quickly the job was done and now my gutters don't overflow when it rains. I don't have time to get up on the roof and risk my safety. They even cleaned the downpipes and the most amazing thing was they left no mess!"

Geoff W. Latham

"Recently we used Guttervac for the first time. Their visit to quote was thorough and it was obvious from the start that they knew what they were doing. The operators came out of school hours to take pressure off us, completed the work with a minimum of fuss and gave us a much better result than we had had from previous contractors. Not only were the spouts and gutter pits clean, but the yards were free from the debris we had suffered previously - no bottles on the ground, no tree litter on staff cars, no mess down the windows. We have many deciduous trees and have now entered into a 6 monthly arrangement to keep on top of the mess they add to roofs and gutters. As a school, we couldn't be happier!"

Bronwyn Harcourt, Principal, Croydon Community School

"I had Joel Parfitt over to do the gutters on my house in Bardon. He was brilliant. Did a great job and knew what he was doing. Very much a no fuss guy who made sure he did the best job possible. Will recommend." **John Rowell, Bardon**

"We have been using Gutter-Vac for years and are always happy with results and the operator." **Mr Creighton, Shelly Beach**

"December '05 cleaned the gutters and 4 days later big fires claimed the property next door but did not spread to our building "because the gutters were cleaned" said the fire department. The gutters had not been cleaned for 12 years. Thank you Gutter-Vac."

Andy, St Vincents De Paul, Arundel

"I'm delighted with your workmanship and professional approach - you actually came when you said you would - very courteous and pleasant workers. I'd like you to come back each year." **Pam Holmes, ACT**

"Excellent service. They were able to give me a written quote with a day of calling them (and I didn't need to be home for them to do this). When I wanted to proceed with the service, they were able to do it within days. They were very friendly and courteous. They completed the job quickly and left the place tidy. Best of all, it didn't take as long as they had anticipated to complete the work, so they revised the quote downwards! Obviously that won't be the case for everyone, but definitely speaks to their honesty and integrity. I would recommend this service. (I was also encouraged by the fact that their advertisement says that they are fully insured and have a complete safety system)."

**GUTTER-VAC®**

Clean. Safe... Easy.

Protect yourself, use Gutter-Vac

Roofs are dangerous places. The edge of a roof (and more particularly, the gutters) is the most dangerous place of all. Many serious injuries and deaths occur each year as a result of home owners and poorly trained contractors falling off roofs and ladders. Carrying out work at heights requires the right training and safety equipment.

Gutter-Vac places an enormous emphasis on safety. Gutter-Vac has developed its own safety equipment specifically for temporary roof work and it has been tested to meet all Australian standard requirements. Gutter-Vac has also developed its own roof safety course, which is Australian standard compliant. All Gutter-Vac operators are trained in roof safety.

Protect your property, use Gutter-Vac

Here at Gutter-Vac we understand that a property is the biggest investment a person can make and we know how important it is to maintain and care for that investment. Maintenance is the key to preservation.

Blocked gutters threaten properties every day.

Blocked gutters are the perfect breeding environment for insects and vermin like mosquitoes, cockroaches, spiders and mice. Often property owners spray their property for pests, only to find that re-infestation occurs within months. Upon inspection, the gutter is often the cause of the problem.

In addition to being a health hazard, blocked gutters also provide fuel for fires and increase the risk of water damage when it rains.

The Gutter-Vac service will help you to protect your property by quickly and safely removing debris and leaves from gutters and downpipes.

Gutter-Vac will also assist you in maintaining your property by providing you with a free roof report and preventative maintenance plan with every gutter clean. The Gutter-Vac roof report and preventative maintenance plan are useful maintenance tools for property owners and managers who need to stay abreast of property issues.

The Gutter-Vac service benefits

The Gutter-Vac cleaning service:

- ✓ saves time and effort
- ✓ reduces breeding areas for insects (especially disease carrying mosquitoes!)
- ✓ reduces the possibility of fire damage
- ✓ eliminates water build-up and serious damage to ceiling and building structures caused by blocked gutters (reducing the risk of damage to valuables!)
- ✓ lengthens the life of gutters
- ✓ is cheaper to use twice a year for ten years than it is to install gutter protection devices
- ✓ eliminates the risk of falls and the public liability issues associated with height safety

Prior to Gutter-Vac there was only one way to effectively clean gutters and that was by hand. Gutter-Vac pioneered the first effective gutter vacuuming machine and we are dedicated to the development of our machinery, training methods and the application of our safety systems.

Property owners and managers love Gutter-Vac. Our proven systems and world-class equipment ensure an efficient and professional job, first time, every time. Our pricing structure provides fantastic value.

So, ask yourself, can you afford not to use the best? Call today to find out more or make a booking. We guarantee not to disappoint. You can also book a job or quote online at www.guttervac.com.au
