We would love the opportunity to provide you with a free quote today.

**LED LIGHTING
SPECIALISTS**

HALOGEN DOWNLIGHTS ARE COSTING YOU MONEY

Halogen lights are highly inefficient. They convert only 10% of their energy into light with the other 90% released as heat. Not only are they a fire hazard but their lamp life is only 1,000 hours, making regular replacement a necessity.

LEDs not only provide a WOW factor to your home and business, they do not burn like a standard halogen bulb which means they are brighter, last longer, are cheaper to run and produce very little heat.

LED Down light Kits provide a complete replacement for your current halogen lights. There is no mess, no fuss with kits able to be fitted into most existing halogen cut outs.

ESTIMATED SAVINGS

Switching to LEDs, can save you between:

- ▶ \$60 per down light per year based on commercial use of 12 hours a day.
- ▶ \$25 - \$30 per down light per year based on domestic use of 8 hours a day.
