# ACRYLIC PHOTO BLOCKS

With interchangeable feature

icepix

MORE THAN JUST A PHOTO FRAME

The only DIY acrylic photo block on the market. Turn your favorite images into an impressive 3D artwork. The advantage of our acrylic block is it's unique design that allows you to easily change your images whenever you wish.
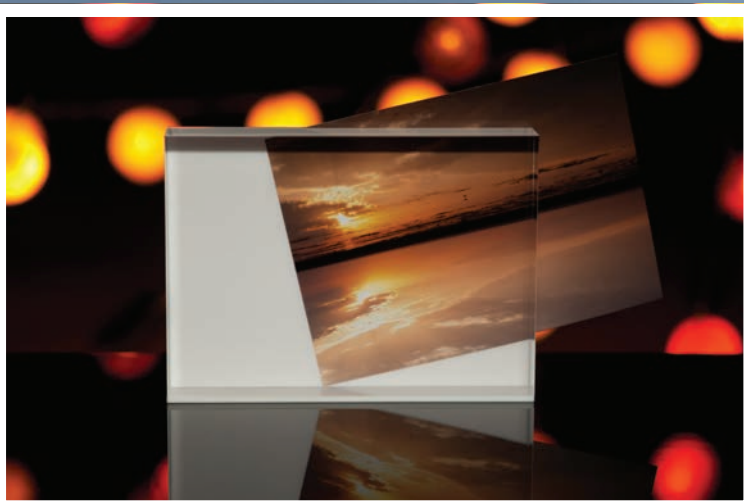

Icepix Photo Blocks provide a freestanding display making it ideal for desks, coffee tables, mantle pieces & office receptions. Each block is diamond polished for a superior finish.

SIZE & SPECIFICATIONS

Size	Colour	Thickness
6x4'	black	30mm
6x4'	white	30mm
5x7'	white	30mm
7x5'	white	30mm
8x10'	white	30mm
10x8'	white	30mm

DIY

Unlike other alternatives there are no internal fixing such as magnets etc. which interfere with the viewed image. You have all the benefits of a face mounted block without the restriction of having to choose a single image. 30mm thick clear acrylic are used on our blocks providing a freestanding display making it ideal for desks, coffee tables, mantle pieces & office receptions. Each block is diamond polished for a superior finish.

Insert your image in 3 easy steps

Step 1 Turn your block upside down so that the clear acrylic side faces upwards. (The opaque acrylic faces down)

Step 2 Gently open the gap between the clear and opaque acrylic (2-3mm) and carefully insert your print upside down.

Step 3 Align your print to the centre and turn the block back to the correct way. (Opaque acrylic faces upwards)
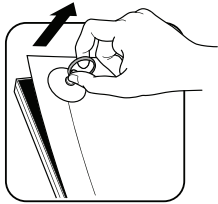

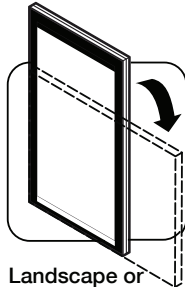

Point Of Sale Solutions
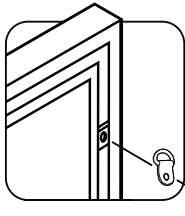

Thin & Elegant Designer Lightboxes

Make your brand come to life and stand out from the rest by using the strong, ultra thin & super bright LED lightbox range. The high quality alluminum frame is just 12mm thick, the lightbox display is much brighter and more efficient than standard flurorescent lightboxes.
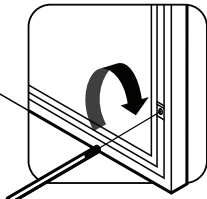

New

Easy to replace graphics with removable front face

Landscape or Portrait display

30,000 HOURS

super bright

Wall hook supports included

Counter display supports included

LED Technology helps reduce environmental impact

Our lightboxes are super bright, but use less than half the power of normal floruescent tubes, it is also longer lasting with an astonishing 30,000 hours of life per globe.
