BUSINESS SUMMARY

DWA Industrial Resources Pty Ltd is an engineering and fabrication company that has been servicing the mining industry since being established in 1995. DWA specializes in providing isolated mines fly in / fly out staff offering a wide variety of trades to suit our client's needs, DWA prides itself by supplying the right staff with the right qualifications for the right project. This service is also supported by our fabrication workshops based in both Perth and Derby.

STRONG SAFETY MANAGEMENT

DWA enjoys an outstanding safety record which reflects its ever growing safety culture. All of our employees must complete a personal interview for suitability and pass drug and alcohol screening before being considered for work placement. DWA manages its safety through the use of our policies and procedures to provide and maintain a safe workplace. All DWA employees are responsible for reporting any problems or incidents and are encouraged to give suggestions and work with management to prevent any recurrences.
