“Simple Design,
Simple mechanism for a
Simplified
Security
Solution”

OVERVIEW

Symplex Solutions is an Australian company based in Melbourne dedicated in providing Electronic Security Solutions by adopting cutting-edge technology to offer simplified solutions that are reliable and affordable.

With a proven track record in providing enterprise level solutions our hardware and advanced software technology is carefully benchmarked and selected to meet each specific site and customer requirement.

Symplex is a niche provider in the Electronic Security Industry, specialized in offering conventional and IT enabled surveillance, intrusion detection and LAN centric solutions for residences, SOHO's, SME's, and Corporate clients.

Prior to implementing of systems regardless of the type of business or individual, each and every security risk and gap is carefully analysed to deploy the most practical and cost effective solution to give value to every dollar spent on your security investment.

With a clear understanding of the physical security, video, voice, and data network requirements **Symplex** solutions are dedicated to provide customers with tailor-made solutions that can deliver many combinations of designs to suit multiple requirements. Some of these packages are HomeGuard, RetailWatch and Center Management Solutions. Following is a range of solutions and expert services offered by **Symplex**.

SOLUTIONS

- » CCTV and IP enabled Video Solutions
- » Intrusion Detection and Burglar Alarm Systems
- » Access Control
- » Dedicated and Hosted Surveillance
- » Multi Campus Wireless Solutions
- » Integration

Services

- » Design
- » Planning
- » Installation
- » Cabling
- » Commissioning
- » Training and support
- » Consultation

TECHNOLOGY

Being able to understand and implement conventional and cutting edge security solutions “SympSmart Technology” focuses on the solution requirement of the specific site and customer needs by leveraging IT and Network technology and apply convergence in design and development where solutions are fuelled with reliability, efficiency and manageability. SympSmart is applied in the areas of Surveillance in IPVS, remote access and storage along with intrusion detection.

Advantages of using SympSmart Technology

- » Users can easily migrate from Analog Closed system (CCTV) to an IP- based digital open system and enjoy the benefits of live or remote viewing and recording
- » Replication of costly switching infrastructure can be eliminated
- » High-quality video surveillance can be applied across any number of client offices or sites
- » Energy efficient, scalable, cost-effective, and flexible
- » Management of disparate security systems is made easy and efficient
- » Able to utilize modern as well as conventional surveillance/ intrusion detection equipment
- » Implementation of sophisticated user profiles, for user restriction and access

Hosted Video Storage (SympServe)

With SympServe Technology, recording and storing video is made site independent with modern compression and streaming capabilities coupled with smart, secure storage that can enable users to view either one or multiple sites with a secure user login and perform recording, remote view, and playback based on their requirement with added benefits such as monthly reporting, maintenance and updates.

Key Features

- » Remote footage access and playback of archives
- » Efficient remote storage and streaming
- » Save on costly onsite hardware and safety enclosures
- » Video data is protected in case of vandalism or disaster or system failure
- » In-house IP video server
- » Notifies if the cameras are not archiving or offline of storage server
- » Eliminates the need of onsite recorders
- » Remote system maintenance of OS updates and patches

Symplexx PACKAGES

Symplexx HOME GUARD

Each and every security and intrusion gap is carefully analyzed in residential properties unlike an off the shelf D.I.Y security system, thus considering the physical structure and location and giving the customer a simple and affordable solution. This comprises of cameras, motion sensors, read switches linked to an alarm panel which integrates with surveillance system to enhance remote monitoring and event verification by user.

Benefits of Symplexx HomeGuard

- » Elimination of falls alarms
- » Take prompt action
- » Minimize risks to property and life
- » Better means of evidence for law enforcing agencies
- » Able to monitor events that are inevitable and which can save lives and minimize the consequences

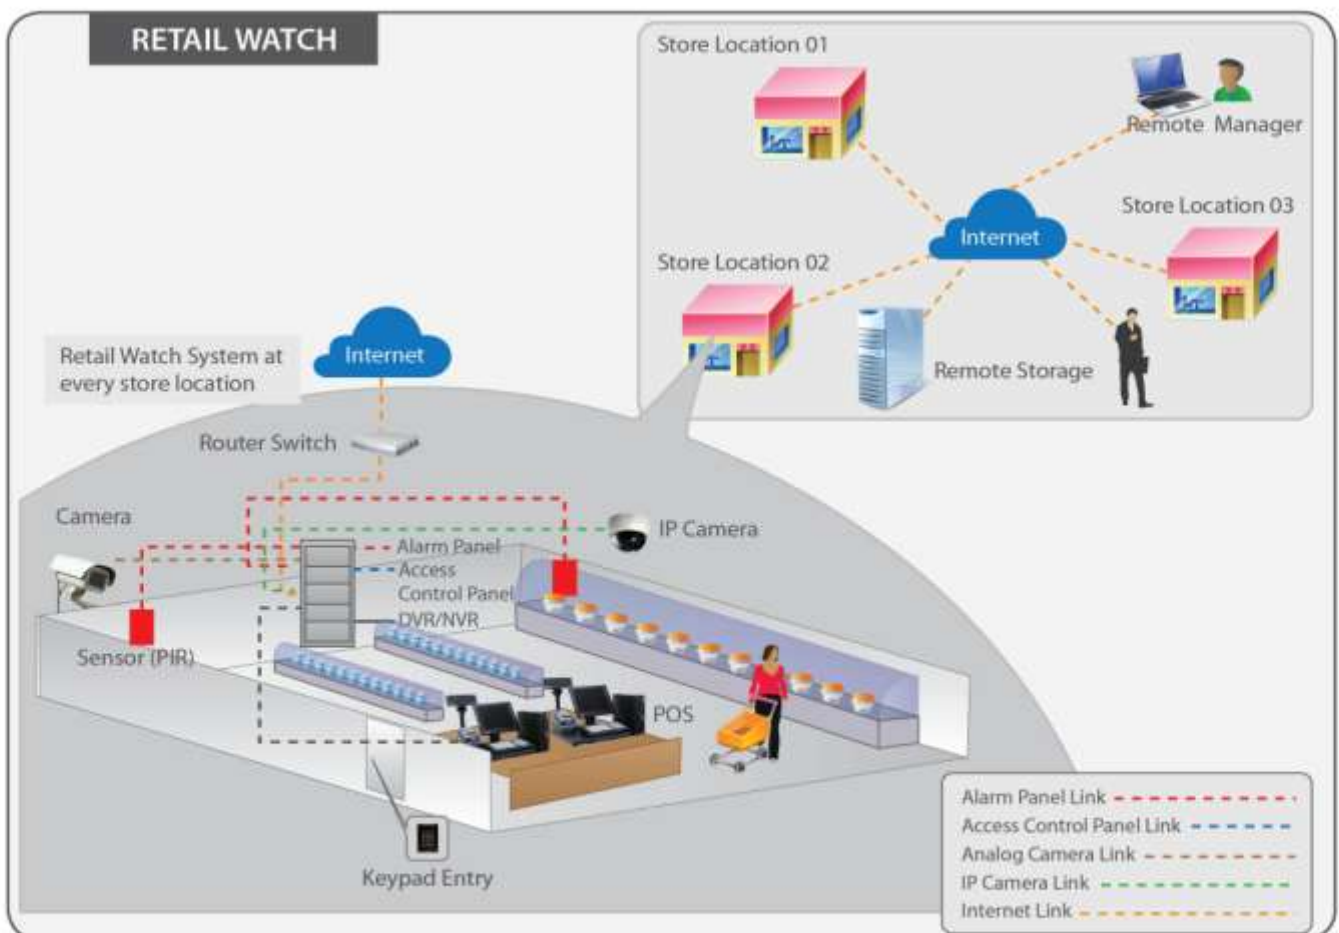

“We don't just protect your premises; we let you enjoy peace of mind with a secured business...”

Symplex RETAIL WATCH

Symplex RetailWatch is a dynamically applicable retail surveillance and intrusion detection solution that suits small to midsize retail outlets with single or multiple stores located in one or multiple locations. By carefully considering specific site, merchandise, and customer requirements of the retail outlet, disparate systems such as analog and IP cameras, POS integration, alarm sensors (PIR) and, glass breakers, panic buttons, with smart card readers and keypad access are combined to produce an integrated solution that specifically addresses the retail surveillance and intrusion detection needs.

Benefits of RetailWatch

- » Minimize shrinkage
- » Monitor all stores at the same time
- » Make quick decisions and also able to alert staff on violations, accidents, and merchandise
- » Control and monitor a wide array of cameras, motion sensors, staff and customer access and alarm systems
- » User Profiles can be created and easily managed

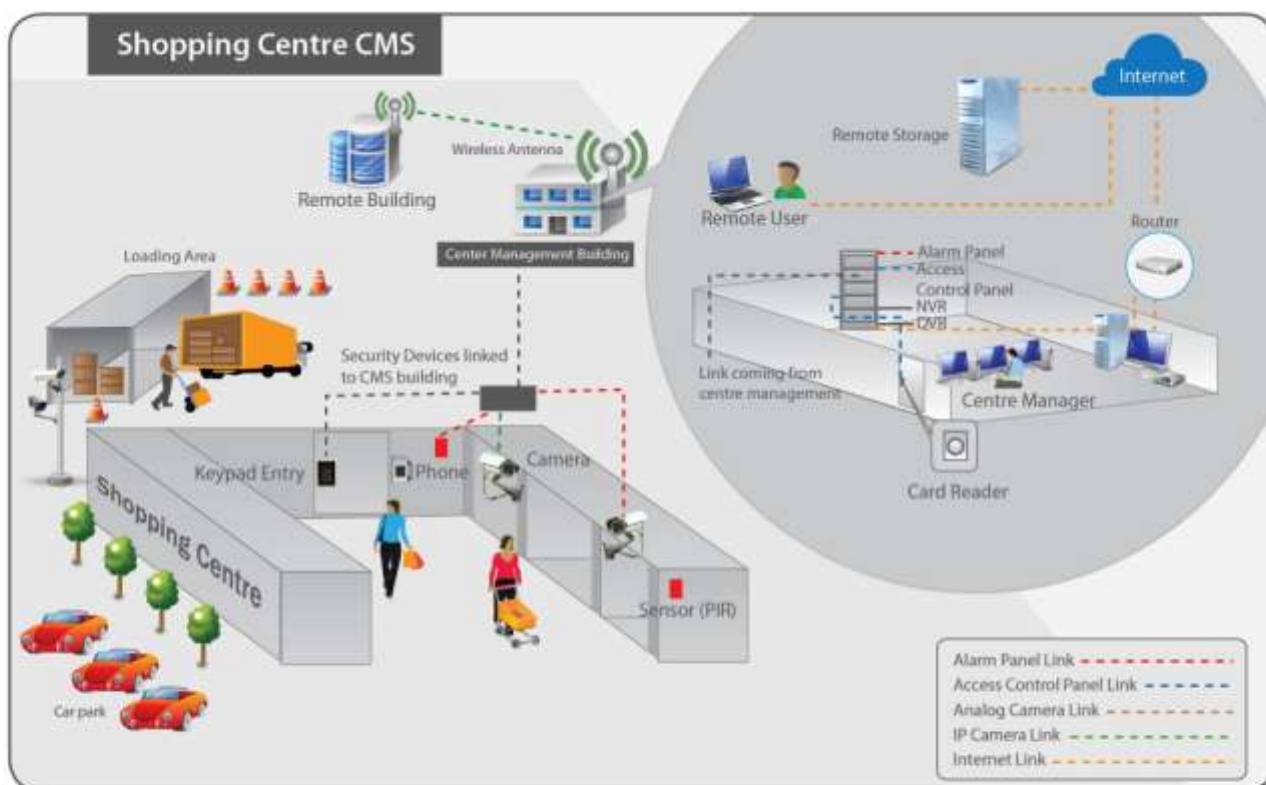

Symplex CMS - CENTER MANAGEMENT SOLUTION

Symplex CMS is tailored for small to medium shopping malls and retail and educational establishments, with a center management facility onsite. Depending on the locality, location and physical structure and vulnerability areas such as the lobby, corridors, walkways, exit and entry points, including loading bays and remote buildings are all controlled and monitored by our Integrated Center Management Solution. Set up with an array of analog and IP cameras, door entry and access control, alarm systems with wireless point to point links connected to the CMS office in order to centrally control and manage the premises whilst having provisions to relay to a third party monitoring center.

Benefits of Symplex CMS

- » Minimize and prevent theft, vandalism and trespassing
- » Easier control and monitoring through a centralized monitoring facility
- » Able to access and alert different zones and petrol staff
- » Remote supervision by area managers and decision makers

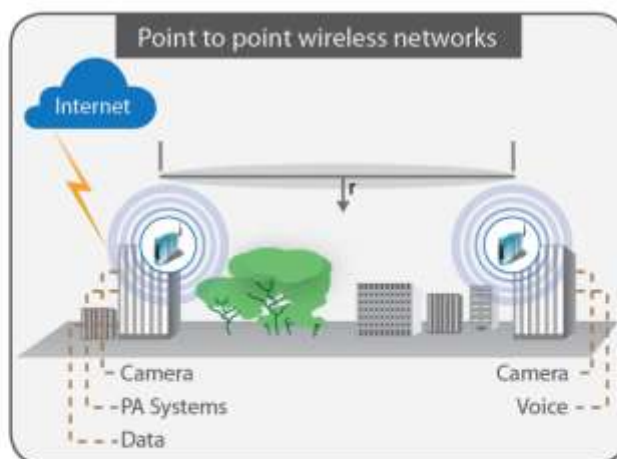

Symplex WIRELESS NETWORK SOLUTIONS

Symplex offers wireless solutions which are specially designed for the small to medium businesses that are looking for fast, reliable and secure wireless access that guarantees 100% uptime. For many years we have been building wireless systems to facilitate reliable communication of high definition video, voice and data.

Point to point wireless networks

Point to point solutions are designed to give reliable office to office or building to building voice, video or data communication. Point to point systems are ideal for manufacturing plants, warehouses, shopping centers, motels, schools, multiple offices or home offices to enjoy long distance wireless access with no ongoing spending for internet services. Our solutions are able to cover a WIFI 5-10km distance with high bandwidth and fast connectivity.

Symplex SYMP CUSTOMIZATION

Apart from the above core products and services, Symplex also offers customized solutions for an organizations LAN/WAN, convergence and storage requirements with monthly managed services model for physical security and network infrastructure coupled with value added services such as hosted surveillance video, wireless hotspot and internet billing systems.

Areas where Symplex Security Solutions are applied

1. Residential properties such as suburban homes, town houses and serviced apartments
2. Small office premises, modern office suites and managed offices
3. Schools, universities and training centers
4. Retail outlets and shopping malls
5. Hospitals, medical centers, and surgery's.
6. Child care, aged care, and retirement villages
7. Call centers and data centers
8. Hotel, motels, and entertainment centers
9. Construction sites, wrecking/scrap metal yards
10. Manufacturing and production plants
11. Car parks, transport depots and service stations
12. Local government institutions and law enforcement agencies
13. Unmanned sites such as power distribution/communication booths
14. Control room and monitoring facilities

Key Benefits of using Symplex Solutions

1. Flexible and cost effective solutions
2. Able to understand and deliver security and IT converged systems
3. Tailor made to suite today's demanding technological environment
4. Can overcome the limitations of the traditional security systems
5. Costly switching infrastructure can be replaced
6. Low cost ownership
7. Hardware is location independent which improves scalability
8. High levels of redundancy with IP integration
9. Control and monitoring becomes more scalable and efficient
10. The system integrates seamlessly with your IT network network
11. In case of vandalism of DVR recordings could survive with remote storage
12. Allows system wide diagnostics to ensure everything is running smoothly (maintenance)
13. Integration is made easy with expert design and tailor-made solutions
14. Access control with smart analytics and enhanced building security
15. Prioritizing authority levels
16. Single point of contact for all your integrated security and network needs
17. Huge productivity improvements by using analytics software during the search and playback of recorded material in post-event analysis
