

We create gardens that are truly inspirational, not just immediately created but forever. We believe in establishing low maintenance, practical beautiful spaces that take into account the surrounding architecture, your preferences and lifestyle.

The design process starts with a 90 minute consultation with our head designer. She will spend time with you to understand your requirements and provide you with thoughts on upgrading or transforming your garden. Once we understand your requirements, we develop a unique design, accompanied by a 60 minute catch up discussing the final plan and the detailed quote which will include agreed timelines.

Project Management - POINT OF DIFFERENCE!

We can manage the entire project and transform the design into reality so you don't have to disrupt your busy lifestyle! A package is tailored to your needs and may include the involvement of other trades such as builders, pool specialists, electrical works, water feature installations etc. We will endeavour to manage the project in phases to ensure the best possible result is achieved and on a timely basis.

Landscape Solutions

We offer the following design solutions tailored to suit all budgets. Depending on the size of your project, we can offer you one or more of the following.

For a nominal cost, we will include a photo gallery, description and maintenance guide for the plants selected for all Concept Plans and 3D designs. If you choose for me to project manage, I can put you in touch with appropriate people for maintenance and landscape construction. Their landscape services include:-

- Landscape construction
- Paving and outdoor tiles
- Water features
- Instant/Artificial/Synthetic turf
- Retaining walls
- Garden construction and planting
- Fencing
- Decking
