About Us

Welcome to Jtagz®! We are an Australian based company specialising in visual identification tags. Situated in Central Queensland, Jtagz® provides RigTag® and WrapStrap® tags to all corners of the globe.

Our family owned business has more than 35 years experience in the printing industry. We strongly believe in our motto “Service · Quality · Integrity” and strive to deliver exceptional quality products and reliable service every time.

Jtagz® ID tags are manufactured from the world’s finest UV light stabilised nylon and colour pigments that comply with international quality assurance standard ISO 9001.

At Jtagz® your order can be customised to include any information that you desire, using hot foil to ensure a deep permanent print on the tag surface. This is all done from our premises and delivered worldwide to your doorstep within two weeks of placing your order.

Jtagz® is a proud and long serving Member of the Lifting Equipment Engineers Association (LEEA) and the American Wire Rope Fabricators (AWRF).

Jtagz® attends international exhibitions and training conferences annually to remain in touch with lifting advances and education. Look for our team at your next Expo.

Jtagz® products can be purchased online or by contacting the friendly staff at Jtagz®. We look forward to supporting you with your custom tagging requirements.

RigTag®

The RigTag® is our most sought after product, made from durable nylon with a dual clasping mechanism. Our RigTags have a variety of purposes, however they are most commonly used to identify periodic inspections on lifting and rigging equipment. Jtagz® RigTags will endure the harshest performance conditions and last the distance every time.

Jtagz® RigTags are ideal for tagging:

- Slings
- Shackles
- Wire Rope
- Fall Protection Equipment
- Tools and Hire Equipment
- Safety Equipment
- Freight Containers
- Pipes and Hoses
- Electrical Equipment

300mm RigTag®

PRINT AREA 46x9mm

TONGUE 240mm

Tamper Evident System

The RigTag® is the only inspection tag on the market that offers tamper evidence.

Once applied, the RigTag® fastening system develops an almost unbreakable bond. With safety in mind, our Tamper Evident tags have been designed so that you can easily detect if they have been removed and reapplied.

How can you discover if a RigTag® has been relocated to uninspected gear?

Using the Tamper Evident System

1. When first applied, the RigTag® is secure and the tail is cut flush to the clasp system.
2. If the RigTag® has been forcibly removed from equipment, the fin inside the clasp system becomes unmistakably stretched.
3. Another sign of tampering is if the RigTag® tongue has not been trimmed to size.
4. To check if tampering has occurred, remove the RigTag® from the equipment by cutting through the female head so the dual clasp mechanism can be inspected.
5. Tampering is clearly evident if the fins are distorted. In addition to that, there will be bruising half way down the nylon on the underside of the female barbs.

WrapStrap®

The WrapStrap® is a durable nylon tag that is primarily used for the identification of cats and dogs. Placed around the band of the collar, this tag will endure the daily activities of your pet and can easily be transferred between collars.

The versatile WrapStrap® tag is used in a variety of different ways; from labeling fisherman's crab pots to the validation of lifting gear in heavy industrial industries. If it's space you require the WrapStrap® tags have a large printing area, which is fully equipped to fit all of your custom details.

Jtagz® WrapStrap® tags are ideal for:

- Pet Rescue Identification
- Pet Registration
- Crab Pot Identification
- Fall Protection Equipment
- Tools and Hire Equipment
- Safety Equipment
- Freight Containers
- Electrical Equipment

Ordering Details

Ordering

Jtagz® caters for all business sizes with a 200 minimum order and an unlimited maximum print run. Please note: Artwork must be the same for the minimum 200 tags.

If you require multiple colours each print run can be broken down into a minimum of 100 tags per colour. Please note all tags are quoted and printed in sets of 20, for example quantities of 200, 220, 240, 260 etc.

To receive the best possible price ordering in bulk is encouraged, as Jtagz® uses a tiered pricing structure where the unit price decreases as the quantity increases.

Custom printing

Jtagz® uses hot foil print presses to deeply embed your custom artwork. Using black or white foil to contrast with the colour tags that have been chosen. See Colour Chart for more information.

Your printing options are unlimited. Jtagz® sales staff will produce a print proof for approval before your order can proceed. Choose to add your company logo, small artwork, custom text or consecutive numbering.

Numbering

Consecutive numbering is available on both the RigTag® and WrapStrap® tags, with a minimum of 4 numbers to a maximum of 7 numbers. With letters also available for print, you can choose up to three letters in front of the minimum 4 numbering sequence. E.g. CLK0001 – CLK0200

Product Tips & FAQ's

Make application even easier with a Tensioner Plier!

Use Tensioner Pliers to tighten RigTags around your item and to neatly cut the remainder of the tag flush to the clasp. Tensioner Pliers can be purchased online or by contacting our Jtagz® office.

How can I write on or mark my Jtagz®?

Marking our products is as simple as using a permanent marker. With a smudge resistance surface, our Jtagzs allow you to write and tag your items instantly. Another way to mark your Jtagz® is by using a hole punch or a stamping tool which can be found at any hardware stores.

I need a longer tag!

If an extension is require the 175mm and 300mm RigTags can join together to extend the length of the tag.

How do I remove Jtagz® tags?

Jtagz® tags can be easily removed by using a stanley knife or side cutters.

What is the RGBY System?

The RGBY system is the preferred method used in mining and construction industries. The colour coded RGBY maintenance system allows for easy visual quarterly inspections.

The RGBY system is separated into the following months:

RED January, February & March

GREEN April, May & June

BLUE July, August & September

YELLOW October, November & December

Jtagz® can customise tags to suit your requirements so please don't hesitate contact us today for a print proof and quotation.
