NANO NG1010 PROTECTIVE COATING FOR GLASS

- Repels water
- Easy to clean surface
- Excellent abrasion resistance
- Hard wearing protection
- Long lasting, durable protection
- Scratch resistant

COMPANY OVERVIEW

Clear-az-Glass Fencing specialises in the professional installation and design of all types of glass pool fencing, internal and external glass balustrading, tubular fencing, powder coated aluminum and aluminium wood look screens, gates and stainless steel post and wire. Safety is always a major concern for homeowners and business proprietors. We place a strong emphasis on quality throughout each step of the installation process. For this reason, the components we use all comply with the latest Australian Standards and have been tested, and approved to Nata specifications.

We source the best possible products to ensure that your fencing is built to last. Our attention to detail extends to all aspects of the project especially with the installation.

We use 10mm and 12mm toughened grade "A" safety glass which has gone through extensive testing and has the AS/NZS stamp of compliance.

The glass is available in different sizes and can be custom made to any configuration.

BALUSTRADING

We offer all types of balustrading. Whether it be on your balcony or glass panels for your stairs. You can choose from numerous designs USING aluminium or stainless steel, or a combination to suit your needs both domestically and commercially.

FRAMELESS

The toughened glass we use is secured with Duplex 2205 Stainless Steel spigots, or side fixed with 316L Standoff pins, which are corrosion resistant with excellent tensile strength. This makes it suitable for outdoor environments as it is able to withstand harsh weather conditions. The stainless steel requires minimal maintenance and is designed to last.

SEMI FRAMELESS ALUMINIUM OR STAINLESS STEEL

This system consists of 316L marine grade stainless steel or aluminium posts that are then core drilled into the ground. The toughened glass is elevated between the posts. The pool fences can be fixed directly to concrete or timber surfaces

GATES

We carry a range of glass gates in different sizes and variations. The gates are fitted with polished Marine Grade 316L stainless steel self-closing hinges and latches. Our products are designed for safety and ease of use.

WHY CHOOSE US?

Clear-az-Glass Fencing employs highly skilled, fully trained team members, to provide professional installations of pool fencing and balustrading. Our industry experience is what distinguishes our services from the rest.

You can expect the following when you choose us for your next project:

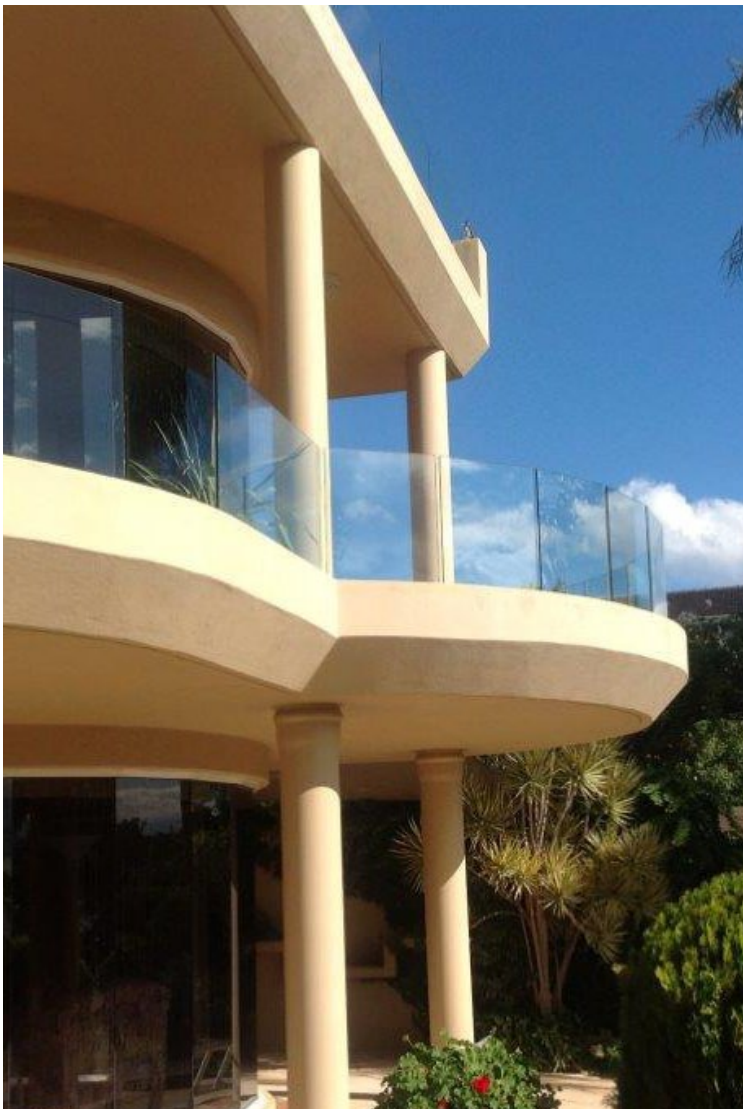

- **Quality products:** Our products have been tested to Nata specifications. We only use premium glass and stainless steel hardware that meet industry requirements. This ensures a quality finish with absolutely no compromises.
- **Lifetime Warranty:** We are able to offer this due to the confidence we have in the extensive testing we have initiated for our products.
- **Professional installations:** All installations are completed to exact specifications. We guarantee the fence we install will meet all pool safety regulations.

- **Personalised services:** We understand that fencing needs are different for every property. We work closely with you to deliver personalised services based on your requirements.

- **Competitive pricing:** Our solutions provide incredible value that is simply unmatched. We offer some of the most competitive rates on the market.

- **Prompt services:** We value your time and strive to complete all projects in an efficient manner. We make sure to leave your pool area clean when we are finished.

- **Shire Approval:** We are happy to assist you with your Shire application for your pool fencing
