HOSELINK's No-Burst Guarantee

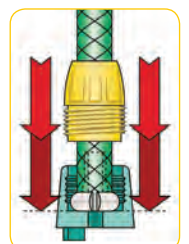

When fitted correctly, we guarantee that your HOSELINK hose fittings will never burst off your hose! If it does, we will send you replacement connectors, provided that:

1. HOSELINK Connectors have been correctly fitted as detailed in the instructions;
2. You have first contacted us via telephone or email to see whether it can be easily resolved;
3. Any faulty component is returned to HOSELINK with proof of purchase. Any faulty component will be replaced. Our guarantee applies to any HOSELINK hose fitting with the exception of the Click-on adapter (Code 2490).

What makes our fittings so special?

Four years of design and testing culminated in a new and unique patented technology in the hose fitting market.

HOSELINK's design makes connecting and joining easy, with a simple point and twist that is easy even for those with arthritic hands. Each side locks together with a bayonet type fitting, which has an O ring to O ring seal, making it watertight. The face of each fitting is identical, making them interchangeable with each other. Most importantly, the hose is held in place securely over a stem with a barb in it and with a split ring, this makes it impossible for the fitting to burst off the hose.

Hose Fitting Components

Hose fittings a-la-carte! Choose what you need to build your burst-free watering system exactly as you need it.

ON ALL HOSE FITTINGS

Tap Connector

Screw directly onto any size Australian tap for a 100% watertight seal. Includes size reducer. Can also be used with pressure washers.
