

elders pest control

Australia's Most Accredited and Award Winning Pest Control Firm

About Elders

The trusted force in pest management, Elders are Australia's most accredited pest control firm and one of the fastest growing firms in the industry.

It's an industry plagued with mismanagement and unprofessionalism; that's what differentiates Elders so dramatically.

A source of reliance for some of Australia's largest companies and Government organisations, Elders set a benchmark far in excess of their nearest rival and as such, continue to be recognised in some of the country's most competitive business awards.

Certified Assurance

Elders have certified Quality, Occupational Health & Safety, and Environmental Management Systems – all continually audited by SAI Global (a subsidiary of Standards Australia).

These endorsed systems form the company's Integrated Management System (IMS) which is your assurance of quality and value-for-money service.

Markets Served

Residential, commercial, government, quarantine; our team deliver confident advice and support with a level of professionalism rarely experienced.
