

Q-perfect

A new concept in management systems

Q-perfect redefines the relationship between quality, project management, and product development.

The Q-perfect Knowledge Bank is a powerful set of process assets which maximise the efficiency of your team.

Designed for ease of use, the Q-perfect record system maximises visibility and interaction between the management system and the broad community within the company.

Q-perfect facilitates compliance through incorporation of management records into your company's daily business.

The Q-perfect Innovation Environment is an integrated product development and project management system.

Product development features include requirements management and traceability, V&V tracking, design review, document review and approval.

Project management features include project reporting, risk management, stakeholder management and communications, issues management and other PMBOK functions.

FREQUENTLY ASKED QUESTIONS

Q Can my existing processes be used with Q-perfect?

a Yes. However, the Q-perfect system may need to be customised to include any additional record fields or work flow steps required by your processes.

Q Is Q-perfect certified to a quality system standard?

a No, Certification is not awarded to a system, but is awarded to a company and takes into account the scope of the company's activities. Q-perfect enables certification.

Q Is Q-perfect compliant with quality system requirements?

a Yes, Q-perfect has been formally validated against ISO 9001:2008. Q-perfect has been used to facilitate certification for multiple companies.

Q How long will it take my team to integrate with Q-perfect?

a Q-perfect can be deployed within weeks. Two training cycles are provided, over an elapsed time of 8 weeks. Product development and project management practices may however take several project cycles to fully mature. Q-perfect provides a new culture to your company and should be seen as a strategic investment.

OUR HISTORY

Marshall Instruments Pty Ltd was incorporated in 1996 to commercialise ultra violet light metering systems for use in phototherapy. Now, trading as Perficio Product Development, the principals of the business have participated in a wide variety of projects including the development of heart pumps, cochlea electrodes, limb perfusion systems, stroke rehabilitation systems, e-commerce payment systems, telecommunications systems, rail signalling systems, transportation control systems and secure wide area networks.

Perficio Product Development has developed a sophisticated set of process tools to assist clients through the product development cycle. These processes are also deployed internally, enabling ISO 9001:2008 certification.

*Perficio Product Development is an
ISO 9001 certified company*

HOW TO OPTIMISE YOUR R&D INVESTMENT? WE CAN HELP

Minimise your time to market and maximise your return on investment by avoiding rework, regulatory failure and process ambiguities. It is not uncommon for regulatory submissions to require multiple iterations before acceptance by regulatory agencies. Many of the product development processes are interlocutory. Omit one process and the integrity of your product and program may be at risk.

The Q-perfect system enables your project team to operate within a compliant infrastructure and to progress through the product development cycle cognisant of the appropriate development pathways available to them.

Q-perfect is the only management system integrating quality, project management and product development aspects into one coherent system.
