## Asset Disposal Services

“ Multi R IT offers the right solutions for your business ”

## Why is it important to you?

### How can we help you?

Our primary focus is to maximise the value and minimise the environmental footprint of old equipment.

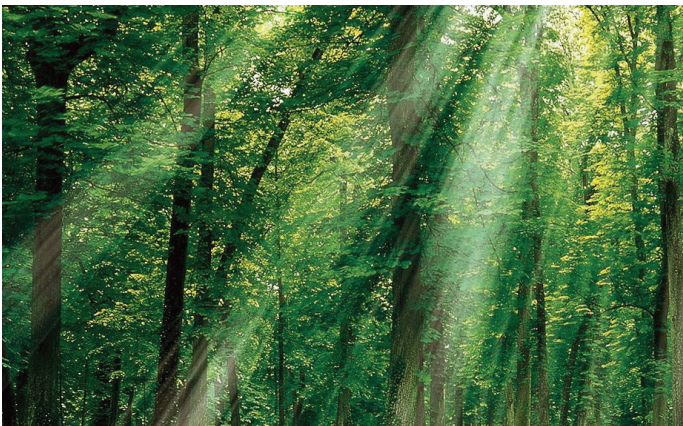

Wherever possible, we aim to do this by extending the asset's life through managing its reuse or redeployment. Given the energy and material resources embedded in IT equipment, this provides the greatest environmental benefit.

However, if there is no further useable value in the equipment we ensure it is securely and environmentally recycled in processes that meet best international standards.

We provide complete IT asset disposition services, helping you to manage the disposal project right through to secure collection, processing and recycling.

Multi R IT has agreements with Australia's leading accredited e-waste recyclers. We can offer our customers the peace of mind that any obsolete or non working equipment is disposed of in an environmentally responsible manner, seamlessly integrated with our other services.

Other services are provided, along with disposal, to maximise project efficiency and security. These include decommissioning and deployment, redeployment of your used equipment, short- or long-term storage, and data security including secure destruction and sanitisation.

### “IT asset disposal is a responsibility, not just an obligation”

As companies deploy new technologies, they are faced with the issue of what to do with their old IT assets.

It is no longer acceptable for organisations to throw out old technology or simply to pass it along without considering the outcome.

IT asset disposal is not only a responsibility to be taken seriously it can also bring financial benefits to your organisation while at the same time being a good corporate citizen.

We help you ensure it's disposed of appropriately and provide full reporting for your corporate governance requirements.

### “We offer complete solutions for your IT Asset Disposition.”

### Key Benefits

- ✓ **Eco-friendly organisation = integrity**
- ✓ **Reuse = cut costs**
- ✓ **Remarket = revenue**
- ✓ **Recycle = peace of mind**
- ✓ **Excellent support = time saving**
- ✓ **Simple, easy and straightforward**
- ✓ **Frees up office space**
- ✓ **Online reports at your fingertips**
- ✓ **Combine with deployment projects to reduce cost**

## E-waste Concerns

Sending equipment to landfill is not only a waste of precious resources but potentially an environmental time bomb ticking for the next generation. Computers contain many toxic substances, in the plastic, the circuit board and the batteries.

These can eventually find their way back into the water we drink, the air we breathe and ultimately the food chain.

What is important though, are the benefits to all of us of "going green." Not just for the obvious environmental pluses but also in terms of corporate responsibility and risk minimisation.

Do  
the right  
thing, become  
an e-waste  
friendly  
organisation

## Asset Disposal Services

- We come to you, collect, individually tag and package your IT assets.

- We transport your IT assets to one of our secure facilities.

- We track each asset through MultiManager our management system and send you comprehensive reports of your assets.

CERTIFIED

recycling solutions.

#### Expert, efficient & committed

With over 25 years experience in the IT industry, we are the experts in providing IT asset lifecycle solutions. What that means for you is an experienced, efficient group that is capable of, and committed to, providing you with the highest service levels.

#### Cost effective

We can reduce costs by combining the removal of old equipment with the delivery and installation of new equipment you've purchased elsewhere.

#### Environmental friendly

We believe in caring for the environment, especially when electronic waste (e-waste) is a major global problem. Multi R IT offer complete e waste recycling solutions with ISO 9001 quality & 14001 environmental accreditation.

#### Premium quality asset management system

Our operations are backed by the best asset management system available for the kind of work we do allowing customers to track IT equipment throughout the process. That means you can be sure your assets & data are secure.

#### National operations and customer support

With premises in Sydney, Perth and Auckland, we are able to offer cost-effective solutions right around Australia & NZ. We have many years experience moving assets throughout the country from locations as far-flung as Christmas Island or Karatha, to the major metropolitan areas.
