

FAQ

Should my windscreen be repaired or replaced?

As a general guide, if your windscreen chip is smaller than a \$1 coin it can be repaired. For large cracks or severe damage, replacement is usually your only option.

When can i drive my car?

From commencement of work most cars are drivable within 2 hours. It takes approximately 45 min to 1 hour to complete the average job and 1 additional hour for the glue to dry. Some older cars and commercial vehicles don't use glue and can be driven straight away.

Will my windscreen leak?

Absolutley not! We use the highest quality adhesives and we guarantee our workmanship for life.

Do you offer a warranty?

Yes we guarantee our workmanship against leakage and defects for as long as you own the vehicle. (excludes rust and damaged bodies)

Will there be any additional costs?

Our prices include brand new after market mouldings if required. Cars that require genuine factory mouldings will incur additional costs but free alternatives are usually available.

Do you come to us?

Yes, we come to your home or workplace.

What payment methods do you accept?

We accept cash or company cheque.
