

INSPIRING THE NEXT GENERATION

WHY BATTERY STORAGE FOR YOUR HOME? THE FUTURE OF HOME ENERGY USE IS HERE.

Did you know that any extra electricity produced by your solar system that is not used is sent back into the electricity network and sold to your neighbours for as little as 6 cents. Gone are the days of the network purchasing this power at a reasonable rate. What if you could store this extra power for use at night or on those rainy days. Lithium ion battery's can be used to store the extra power produced by the solar panels to then be used in the house, reducing your reliance on the electricity network. It's more affordable than you think. And with a 10 year warranty what are u waiting for?

Contact us now to find out how you can join the battery revolution

Guaranteed
**10 YEAR
WARRANTY**

FOLLOW THE TREND & JOIN YOUR NEIGHBOURS BY CREATING A SUSTAINABLE ENVIRONMENT FOR YOU & YOUR FAMILY.

There is still time to install a new solar system or upgrade your existing solar system and get a kick back from the government. Inspire energy have been installing solar pv in NSW and act since 2009 so you can be confident your system will be installed by qualified, experienced personnel. We have partnered with the top manufactures to offer the best solar systems available on the market today.

Solar could SAVE you thousands on your power bill each year. We have affordable (not cheap and nasty) options to help you beat the ever rising electricity bills.
