## About Us

Anittel is an Australian IT & Telecommunications company; providing technology and connectivity services to organisations across regional and metropolitan Australia.

Helping clients achieve their objective is our priority. When you engage Anittel, you partner with a local, professional, service driven team. You gain immediate access to personalised support, a network of accredited engineers and tier-one technology solutions.

Our team services a range of industries including corporate, education, health, finance, government, utilities and not-for-profit. We work closely with our customers to ensure that each solution is designed to meet specific organisation requirements and objectives.

## Why Anittel

- **Local Support Teams**
- **National Engineering Resources**
- **Complete End-to-End Services**
- **Help Desk Support**
- **National Network Infrastructure**
- **Management & Accountability**

# Avoid the cost and complication of multiple suppliers and gain the convenience, accountability and value of a single trusted partner

## Why Anittel

- 
**Local Support Teams**  
 With 17 local offices across Australia, our customers leverage a national pool of resources, skills and expertise.
- 
**National Engineering Resources**  
 With 150 onsite and remote engineers across Australia, your organisation has access to high level support and advanced IT consultation.
- 
**Complete End-to-End Services**  
 Anittel can provide complete end-to-end technology solutions and services; tailoring IT Support, Telecommunications, Internet & Networking, Cloud Services and Hardware & Software. Our range of services are unmatched by any single provider in Australia.
- 
**National Service Desk Support**  
 Our helpdesk provides immediate access to a team of national technical engineers. The helpdesk team can access your system remotely, quickly resolving and troubleshooting day-to-day IT system and user issues.
- 
**National Network Infrastructure**  
 As a licensed carrier, Anittel operates its own National Private Network and Data Centre Infrastructure; ensuring that all Telecommunication, Internet and Hosting services are optimised to provide a seamless experience.
- 
**Management & Accountability**  
 Avoid the cost and complication of multiple suppliers and gain the convenience, accountability and value of a single trusted Technology & Connectivity partner.
