

CREATING ENHANCED
TRANSACTION SPEED
AND ACCURACY.

DATANET IS AN INDUSTRY LEADING INTEGRATOR FOR BARCODE/RFID, WIRELESS AND MOBILITY COMPUTING.

As a company DATANET commenced operations servicing portable computer equipment in Western Australia in 1982 and steadily evolved into a national solutions integrator.

A cornerstone of our success is knowledge and versatility. We design and implement Radio Frequency Identification (RFID), barcoding systems and mobile computing technology to ensure reliable, optimal real-time performance.

The use of our products enables transaction speed and accuracy via labeling/tagging, data capture, validation and real-time communications.

INDUSTRY SOLUTIONS

Warehouse and Distribution

DATANET enhance Warehouse Management Systems (WMS) by utilising:

- **Inventory Identification**

DATANET supply and support a range of industrial printers and labeling materials to uniquely identify locations and inventory.

- **Inventory Tracking**

DATANET supply and support wired and wireless scanning handheld and hands free devices. Handheld terminals are complimented by a wide range of vehicle mount devices available for fork trucks, picking trolleys and pallet trucks.

- **Wireless Network**

DATANET design and implement wireless LAN solutions to provide a balance for voice and data requirements. Datanet wireless engineers place strong emphasis on maintaining the networks' security.

Manufacturing

DATANET develop hardware solutions to validate manufacturing operations. Unattended and handheld scanning devices facilitate a real-time view of materials, parts and finished goods. Traceability and measuring production enables organisations to maximise return from ERP systems and the supply chain.

Field Service and Route Accounting

DATANET develop modular applications addressing point of transaction computing. Our systems encompass field sales automation, route accounting, direct to store delivery, installation and maintenance solutions.

Mining - Oil and Gas

Utilising barcode and RFID, DATANET develops sample identification and tracking from drill hole to lab, encompassing rugged tablets, handheld devices and "bags and tags".

Datanet develop mobile computing solutions incorporating I-Safe handhelds for maintenance data collection and RFID systems for asset track and trace.

Transport and Logistics

DATANET offer solutions for road, rail and maritime cargo tracking. A range of mobile devices and tools enable users to track shipments and deliveries from dock to customer. Information on freight, vehicles, deliveries and workers can be captured and recalled at any point in the journey through the use of barcode and RFID technology.

Government

DATANET design, develop and implement records management and asset tracking solutions.

Retail

DATANET facilitate the supply and support of Point of Sale peripherals and consumables.

TESTIMONIALS

“ Our business has a long and productive relationship with DATANET. In partnership with DATANET we have recently upgraded our existing RF technology platform. With the added mobility and real-time benefits of the RF technology we are able to improve the efficiencies of our labour force both within our Parts Distribution Centre and our Vehicle Storage Facility.”

- Robert Bloxham, ITSD Manager -Toyota WA

“ DATANET'S project success plan (PSP) methodology, knowledge of and access to leading edge technology, dedicated account management and 'can do' attitude were integral components in our selection of DATANET as our wireless and mobility integration partner in our transition towards a paperless warehouse. The warehouse project success also made Datanet the obvious choice for assistance with the mobilising of our merchandising team nationwide.”

- David Frizzell, IT Manager - SPC Ardmona

“ In association with the team at DATANET, Centurion Transport has been able to provide real time Track and Trace throughout our network. This has provided both our clients and staff with a valuable management tool unique in a general transport environment.”

- Andrew Ford, Business Development Manager - Centurion Transport

“ Introducing RF with DATANET has enabled AMCAP to achieve vast productivity improvements. The warehouse has achieved a measurable reduction in labour hours and associated costs with the implementation of the real time management information system and mobilisation of the labour force.”

- Neil Sturrock, Warehouse Manager - AMCAP

“ Developing and implementing a Real Time Job Dispatch & In-vehicle Invoice Solution with DATANET has provided my business with many cost and time savings in addition to a host of productivity improvements. Through the implementation of the real time dispatching system and the mobilisation of my plumbing fleet, we have achieved immediate and ongoing direct annual savings.”

- David Ellingsen, Managing Director - Metropolitan Plumbing & Jim's Plumbing Australia

INDUSTRY USE

Warehouse and Distribution

John Deere, Air Liquide, Simplot, AMCAP, Wesfarmers Kleenheat Gas, Toyota WA, Holden, Honda Australia, Coventry Group, Dynamic Sports and Leisure, Spring Gully Foods, Inghams Enterprises, Rheem, Kresta Blinds, Fonterra Brands, Laminex, Centurion Transport, SPC Ardmona, Rand Transport, Westrac, Polyair

Manufacturing

Laminex, Wespine, Constellation Wines, Yalumba Wines, Geraldton Fishermens Co-op, Mastec, ZF Lemforder, Dorsogna, Auspine, Coopervision

Field Service & Route Accounting

Coates Hire, A E Smith, Metro Plumbers, RAA Insurance, Dorsogna

Mining - Oil and Gas

BHP Billiton, Rio Tinto Group, Woodside Energy, Apache Energy Alcoa World Alumina, FMG, Barmenco, Newmont Mining, Brandrill, BP Australia BHP Billiton Worsley Alumina, Lihir Gold, Citic Pacific Mining, Santos

Transport & Logistics

ABB Grain, Courier Australia, Centurion Transport

Government, Utilities and Industrial Services

WA Water Corporation, Depart. Agriculture & Food WA, Health Dept WA, Depart. Environment & Conservation WA, Australian Submarine Corp, Worley Parsons

Retail

Stratco, MALZ, Taylor Marine, Repco, Venuetix / The Event Shop
