# Look familiar?

Then we should talk.

At BL Computers, we ensure that you'll stop screaming at your computers and wanting to throw them out the window, because with us, your systems will never let you down again.
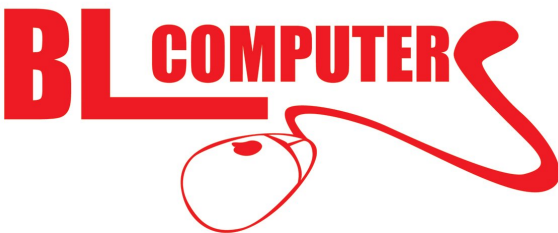

You've worked hard to establish and grow your business, so it's vital that your computer systems not only keep functioning, but do so well.

**That's why we provide proactive outsourced I.T. support and consulting to small-to-medium sized businesses like yours.**

With so many so-called experts focusing on fire fighting i.e. only coming to the rescue when a computer eventually dies, our focus is to prevent this from happening by offering a unique service, that covers:

√ An initial health check to identify issues;
√ Training to prevent it happening again;
√ Hardware and software equipment to help you become more productive;
√ Monthly onsite support and maintenance, making sure your network is running at its full potential, **all for a fixed monthly cost.**

In addition, we can also advise on network and workstation improvements, all of which remove risk, increases productivity and your IP security.

## Are you:

**A business that:**

√ Uses between 5 to 100 computers, where network efficiency and security is a priority
√ Relies on systems functioning perfectly when critical dates and deadlines hit
√ Is plagued by persistent network problems, slow performance and downtime
√ Requires new equipment to grow, but wants help planning that vs cash flow
√ Have employees who access Social Media at work or use Social Media as a marketing strategy

**A business owner that:**

√ Values your business reputation and professionalism
√ Is action orientated, and committed to growing your business and succeeding
√ Wants to increase productivity through education and better I.T. systems
√ Wants to avoid unnecessary risk, stress and loss of productivity due to system failure
√ Has an iphone or blackberry that is synched to your business' system
√ Values the efficiency of a single I.T. provider taking care of all I.T. needs
√ Understands that an effective I.T. network can have a direct positive impact on the bottom line
√ Demands professional, efficient, timely and cost effective solutions
√ Believes I.T. geeks can have a sense of humour
