

The Swipe Card Access System

- Controls who uses your critical or high risk fixed equipment.
- Equipment fitted with a swipe card access system can only be used by personnel with a valid access card.
- Cards are limited to authorised users, who are trained and certified in the equipment's safe use.
- The swipe card access system ensures accountability by recording who accessed the equipment and at what date and time.
- Records operating hours of the equipment.
- Prestart of equipment can be enforced before use.

SWIPE CARD ACCESS SYSTEM

"Control over your Assets"

Installation

- Electrical schematics provided, detailing integration with existing equipment.
- Existing Emergency Stop devices are incorporated into installation process to permit safe use of equipment.

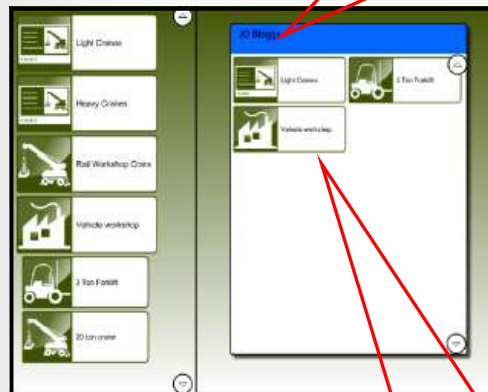

- Simple installation on any electrically powered machine for e.g. Bandsaw, Lathe, Guillotine
- Equipment has a unique identity which is set up in the programming stage and clearly labelled on the equipment to assist with downloading information from the Swipe Card Access System to a dedicated laptop via a long range Bluetooth USB stick.

Managing Access Cards

- Web delivered management software valid for twelve months, renewed annually.
- Administration is password or proximity card protected.
- Card reader simply plugs into PC USB port.
- Operator proximity card is identified by card reader.

Insert authorised persons name.

Double click on icon to set 12 month competency expiry.

- Operator access to various site equipment is displayed by manager software.
- Access is controlled by licence and expiry dates.
- Access to additional equipment is made by dragging the required icon from left of screen onto the operators list of licensed equipment.
