How We Can Help.

The dedicated team of healthcare professionals at HES feel that everyone should have the chance to remain independent and in their own home.

Whilst there are many different products and equipment devices that can assist you to remain independent, there is a need to ensure the right products are being used in the right circumstances. This can maximise the effectiveness of these supportive products.

HES offers equipment for purchase and hire but we also offer a smiling knowledgeable team who will help you make the most of it. It's more than just equipment to us. Oh and did we mention that we can bring a selection of equipment to you at home allowing you to browse before you buy. We also pride ourselves on rapid response, delivering equipment on the same day you order it where possible.

By the way, we have more equipment, small aids & a range of bariatric equipment available - it just won't all fit in the brochure! Give us a call or visit our website if there is something you need but can't see here.

Equipment we hire & sell.

A word from Harry.....

It's best to get professional advice on what equipment you need in your home and how it is best used.

With the correct advice you can remain at home and independent in a safe environment.

We come to you at home.
