

Pricing guidelines

We understand that it is sometimes difficult to budget for a project when you don't know how much things will cost! To help you out, we have provided some ballpark figures to help you on your way. Remember that each property is different, and prices will vary accordingly.

Here are just some of the things that influence price:

- ease of access to ceiling space (eg manhole access)
- construction materials (eg timber or brick)
- existing fittings (ie is there a light or fan there already)
- capacity and quality of existing wiring

Some ballpark figures:

New power point	\$150-\$200
New light or fan	\$150-\$250
Replace light fitting	\$80-\$120
Rewire including new switchboard	\$7,000 - \$9,000
Outdoor power point	\$200-\$300
Smoke detector	\$150-200
Install a safety switch	\$300-\$500

*NOTE: These prices are indicative guidelines only. Remember that individual prices will decrease with the more work we do in the one visit.
