

“ASG are the market leaders in the Industrial Rope Access industry Australia Wide”.

About Advanced Solutions Group (ASG)

ASG was established in 2007 where we have been working in the industrial rope access & height safety industry as eight safety & rope access technicians since 1996. ASG's goal is to – To provide high quality height safety and industrial rope access services to the Sydney market.

Our past projects have seen us consistently deliver on our promises of safety, compliance, high quality workmanship and significant cost reduction. These principles are the basis by which ASG has developed a high level of ongoing repeat business from a range of clients across many sectors and works categories.

ASG has always taken a relationship based approach with its clients, looking to build strategic partnerships with its customers and enhance their technical capabilities on projects requiring difficult access. ASG has done this by providing safe, cost effective, high quality methods of carrying out difficult access maintenance and installing compliant height safety systems which keep Australian workers safe.

Whether it's minor programmed maintenance work, height safety system installation, or if you require rope access services on a major civil works project, ASG have the personnel and the expertise to bring about a successful project outcome for you.

“Industrial Rope Access provide's cost effective solutions for building and maintenance without the needs for expensive scaffold or access equipment. See how we can save you on your next project!”

The advantage of using industrial rope access are that you get a direct cost saving on not having to use access equipment, in most cases the cost of the access alone equates to the same cost as ASG carrying out the works in full, for example the cost of scaffolding a entire building can exceed 100k we have painting full buildings for the same cost, further more the building occupants in most cases didn't even know we where there.

ASG are the industry leaders in Industrial Rope Access with a combined experience level of over 20Years, we are always striving to develop new and innovative techniques for safe methods of undertaking difficult access works as well as efficiency of works, being the market leaders its this experience we bring to offer a service that is superior in quality of workmanship and efficiency of works.

We pride ourselves on transparence for all our works, we believe that it's paramount that we keep 100% transparent level of relationship and build on a trust to provide you with quality service and cost effectiveness.

“ASG have been our rope access and height safety installation company of choice for several years now. Their rope access services have consistently improved our capacity for cost effective access on remedial projects and their workmanship is of the highest quality”

– Mike Palmer, Building Durability Group

CHALLENGE US! WE LOOK FORWARD TO IT!
