PROFESSIONAL EXPERIENCE

Lauran Trevena has been working in Architecture and Constructions over the past 11 years. Majority of work experience has been with local well known architects, building designers, as well as local building companies.

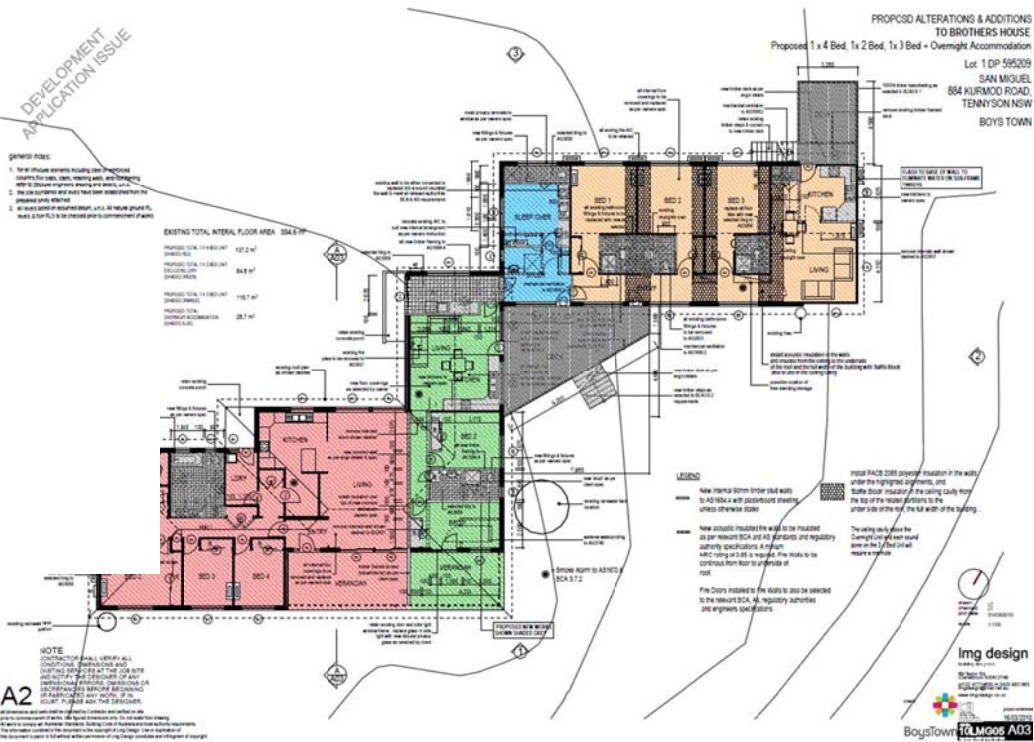

The projects have been mainly all aspects of residential, industrial and commercial architecture. My past employment has given me opportunities to work on NSW department of housing, primary schools, aged care facilities and childcare centres projects.

Lauran Trevena provides a small dedicated design practice, which provides good solid design solutions for difficult sites. She has a proven track record with council approvals all over NSW, with fast approvals or with minimal changes required do to neighbour objection.
