

Happen Business Jim2[®] Business Engine

Amazing Things.
Happen.

- Jim2 is proven Business Process Management and Accounting software used by hundreds of Australian businesses
- Jim2 is Australian designed, developed and supported – the people who make the software are the same people who support the software
- Jim2 manages your entire operation in one business system
- Free lifetime email support
- Simple implementation process

Who is Happen Business?

Before Jim2 Business Engine, Accounting software merely produced financial results. Happen Business developed Jim2[®] Business Engine as a tool that starts with establishing business processes, manages workflow and resources, and completes the process with financial results and profit reporting.

Happen Business is an Australian owned and operated business established in 2001 to fill a growing need in the market for a comprehensive accounting and business workflow software solution.

Happen Business was formed to develop, sell and implement the process driven ERP (Enterprise Resource Planning) and Accounting system known as Jim2 Business Engine.

The company has rapidly established a strong following for its Jim2 Business Engine software and now has an extensive customer base in diverse industries such as IT, Managed Print Services, importing, distribution, sales and service, specialised retailing, and manufacturing.

Happen Business has customers in every state and territory of Australia, with Jim2[®] users from Melbourne to Mt Isa, Port Macquaire to Perth, and everywhere in between.

What is Jim2[®]?

Jim2 Business Engine is a powerful multi-user ERP (Enterprise Resource Planning) and Accounting solution, built for businesses that retail, manufacture, distribute, import, service, or any combination of these.

Jim2 manages every aspect of your business workflow cycle – from stock control, sales, servicing and customer contact to quoting, invoicing, financials and reporting.

Rather than just focusing on accounts and numbers, Jim2 is a tool for your business to better manage and control business operations.

As a business owner/manager, this means less time micro-managing, as the tasks being performed and completed by staff are visible from the software.

“Jim2 is the most comprehensive job management package we have seen. Not only are the functions outstanding, but the support team are excellent, and actually work towards creating meaningful and positive improvements to the software based upon customer feedback. Many companies promise to do this, but never deliver.”

MICHELLE CORNICK
GENERAL MANAGER
REDFOX CORPORATION PTY LTD

Designed, Developed & Supported in Australia, Jim2[®] Business Engine is a complete business solution to manage every aspect of your workflow cycle and solves the growing pains of small to medium Australian Businesses.

CONTINUED OVERLEAF →
