## AUSTRALIA

PowerGen Australia specialises in helping clients meet their power generation needs. From prices and products to services and speed, excellence is the standard to which we commit our business.

As the National Distributor of TecnoGen Generators from Italy & NSW Distributor of Kohler Power Systems from France we take tremendous pride in providing only the finest power generation tools. Our robust inventory includes a wide range of Standby, Rental, Film & Television spec diesel generators to meet almost any need imaginable.

When it comes to service, PowerGen Australia has no peer. Our extraordinary engineers and superiorly trained technicians provide the absolute best in the way of customer care. We complete every job to the exact specifications outlined by the client and back our work with a satisfaction guarantee.

Worried about whether or not PowerGen Australia can accommodate a remote location? — Don't be. Our fully mobile service division can tackle the most complex logistics imaginable, making sure you get the power you need, when and where you need it.

If you'd like to learn more about our products, services or team, reach out to the highly-helpful PowerGen Australia support staff today!

## Generator Sales

At PowerGen Australia we supply a comprehensive range of products including Diesel Generators, Gas Generators, Rental Spec Generators, Automatic Transfer Switches and Load Banks.

For any enquiries you can phone us on 1300 885 789

## Installation

Installing a generator – whether it's a stand-alone or a part of a more complex power system – is no easy task. The slightest mistake in the way of proper procedure can lead to disaster. That's why it's vitally important to enlist the help of proven professionals who know precisely what they're doing.

At PowerGen Australia, we consider generator installation to be our real area of expertise and we lean on a sterling performance record with units from 30 KVA to 2500 kVA to prove it.

## Maintenance

PowerGen Australia offers maintenance services on a wide range of generators whether they're being used as stand-alone power sources or as part of an interruptible power supply.

Like any mechanised device, the parts and processes of a generator can fail if not maintained to certain standards. But with PowerGen Australia's proactive approach to system reliability, you can run your generator at maximum output with complete confidence.

PowerGen Australia's maintenance services are customisable, which means we can tailor our schedule to meet even the most unconventional needs. Talk with one of our technicians today to find a cost-effective maintenance programme that perfectly suits your requirements.

## Loadbanks

For generator testing, nothing can compare to the quality and accuracy of a loadbank.

At PowerGen Australia, our loadbanks are carefully selected to accommodate a variety of environments and applications. PowerGen Australia is able to provide units up to 1,000kw in both Resistive & Reactive options.

PowerGen Australia can offer for-hire and for-sale loadbanks, as well as operation and support services upon request.

Should anything, big or small, go wrong with your loadbank reach out to us immediately and we'll work tirelessly to resolve the issue as quickly as possible.
