ENERGY EFFICIENT TINTING

RESIDENTIAL

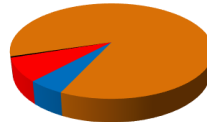

REDUCE HEAT

Whilst windows generally make up around 8% of the total area of an average 3 bedroom home, they are also responsible for 87% of heat gain and 49% of heat loss.

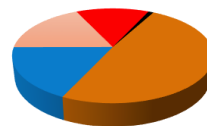

At **Energy Efficient Tinting**, we have solutions that can help you to dramatically reduce the impact of heat gain/loss immediately.

Shares of Envelope Heat Gain

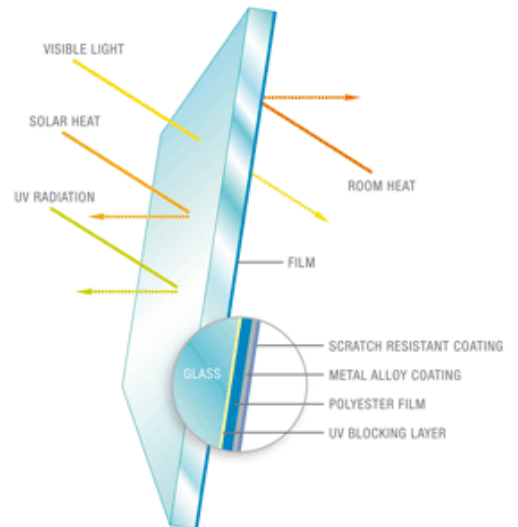

■ Roof ■ Floor ■ Walls ■ Doors ■ Glazing

REDUCE GLARE

At **Energy Efficient Tinting** our range of products include a choice of films that reduce glare up to 85%.

Reducing visible light transmission also creates better living and working conditions by reducing eye strain and associated headaches.

No matter which film is provided on your windows or doors, the reduction of Glare is a guarantee to provide a happier workplace or home.

IMPROVE PRIVACY

With the **Energy Efficient Tinting** range of window films, rest assured that we have a privacy film to suit your needs.

Whether it is frosted film, window tint film, reflective film, stained film or even decorative film, we have solutions to suit every circumstance.

REDUCE FADING & PROTECT YOUR SKIN

At **Energy Efficient Tinting**, our products reject 99% of the sun's ultra-violet rays which is the primary cause of skin cancer and fading of building products such as curtains, carpets, furniture, clothing, fittings etc.

UV rays come in 3 different forms – UVA, UVB & UVC, whilst UVC doesn't enter the earth's atmosphere, the other two can be extremely damaging to your skin's health. Our products eliminate all UV by 99%.

The relentless UV rays that continue to threaten the longevity of building products and health of people's skin can very easily be avoided within the workplace or at home, by the application of our energy efficient window films.

PRIMARY CAUSES OF MATERIAL DETERIORATION (FADING)

INCREASE SECURITY

At **Energy Efficient Tinting**, although we have specialised safety & security film to provide safe & secure windows, all of our products strengthen glass, doors and windows making it extremely difficult for burglars to gain entry into your home or workplace.

Whether it is clear film or tinted, all our film still rejects 99% UV from entering the glass. The tough and durable scratch resistant coating assures care free maintenance with most conventional methods of window cleaning.

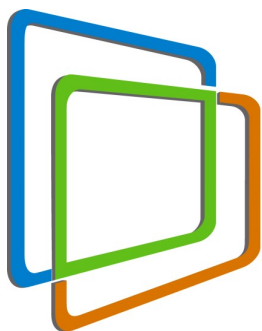

WHY CHOOSE US

Whether you're interested in reducing the heat, glare, improve privacy/security, eliminate UV radiation or reduce energy costs, you have come to the right place.

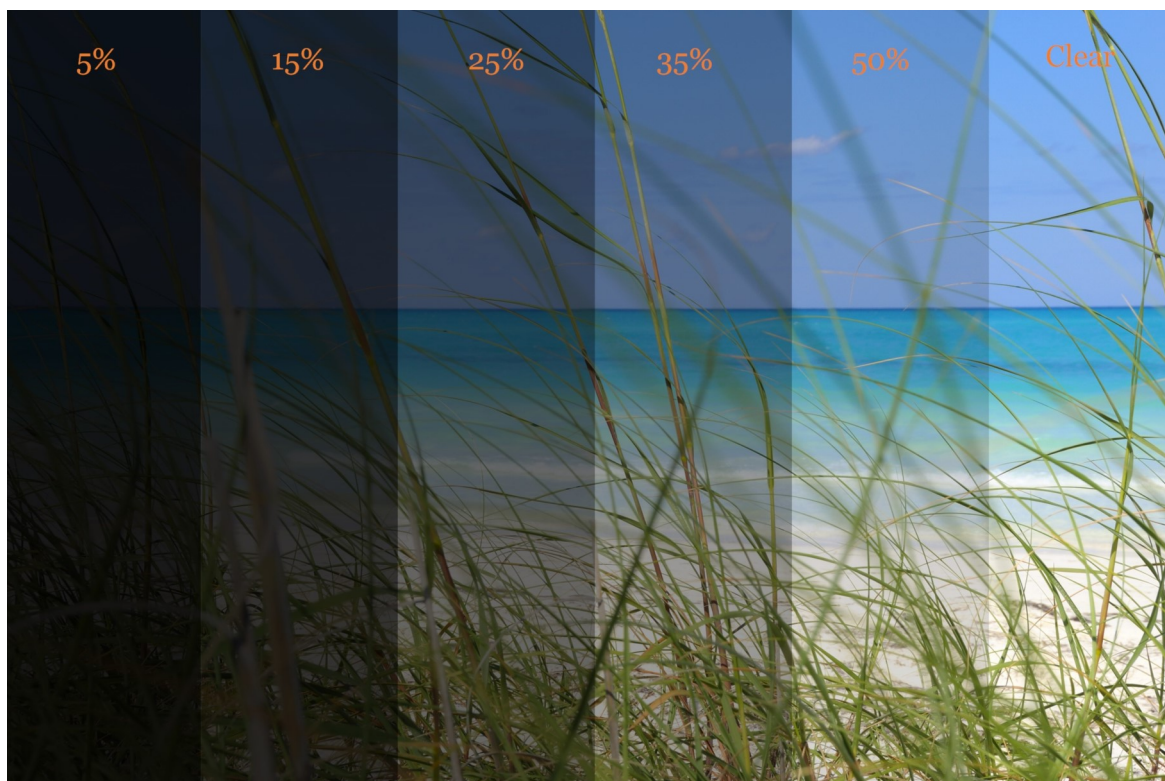

At **Energy Efficient Tinting**, we have a team of highly skilled and professional people who take 100% pride in delivering quality results for our clients. We treat all of our clients matters seriously, professionally and with exceptional service.
