introduction

We are proud to introduce ourselves as a team that provide complete Project Supplies, Value Engineering and Project Management solutions for your construction projects from design and tendering to delivery and installation guidance.

Our strength lie in the expertise we have in understanding client's needs in terms of project materials in the principles of the PM triangle of time, cost and quality.

Our aim is to provide you with the right product, at the right location, at the right time, at the right value, in a right service and with the right information.

Our major objective is perfect order fulfilment which is aimed at meeting following standards:

- ◆ Delivered complete—all items delivered in the quantities requested;
- ◆ Delivered on time—using your definition of on-time delivery;
- ◆ Delivered in perfect condition—in correct configuration to be used by you;
- ◆ Delivered with accurate documentation—all required to support the order and installation.

services

Tender stage support - we are keen to discuss the tender you are working on and support you in providing commercial and design advise

Specification support – we work closely with architects, property owners and D&C contractors in careful selection of right products that meet client and end user’s needs.

Concept Designing & Proposals – we have quality drafters and product designers working for us that will provide you conceptual designs along with commercial proposals for you to compare the quality with cost

Customised product solution – whether it is custom walls or themed floors, for that special need of yours, we will work closely with you to bring your vision on paper and exceed your expectations

High End Product Supplies – special products, special detailing for special clients on their special projects

End to end Project Supply Management – from the earliest conceptual stages of a project right through to completion and review for quality assurance, we add value with sound engineering knowledge and expertise on materials we deliver to top standards of time-cost-quality triangle.

Value Engineering – We are keen to provide you alternative, innovative and cost effective solutions that meet your demands.
