“I use Bluewire for all of my maintenance and highly recommend them.”

- Basil Bresgi, Franchisee Skewers Kebabs

“Bluewire’s professional approach, safety and communication was outstanding.”

- Joe McVey, General Manager Splash City Waterpark

KEY PERSONNEL

Brian Jackson

Brian commenced his career as the first employee of a newly formed electrical service company, working mainly in the residential industry. This entailed wiring and delivering large scale multi-storey and high end custom built homes.

Brian was integral to the growth and reputation of the business and its transition into the commercial, retail and hospitality fitout sectors. He rapidly progressed his career over the years as the company grew from one employee to a team of 20.

In that 22 + years of dedicated service in roles ranging from apprentice, lead tradesman, supervisor, project manager and estimator, Brian has delivered numerous high end fitouts in the commercial, retail and hospitality sectors.

Some of Brian’s key projects include Burberry and Armani (Hay St), Chanel and Georg Jensen (King St), Country Road (Claremont Quarter) and the 200 room and banquet floor refurbishment at The Parmelia Hilton Hotel (Mill St), which he single-handedly project managed.

Brian has now combined his reputation and experience with Jarret Riley to offer their own superior quality and service minded company, BLUEWIRE ELECTRICAL & DATA.

Our highly skilled and experienced team of electricians offer high quality, cost effective solutions, with a total commitment to safety.

We primarily service the Perth Metropolitan area and are also willing to undertake regional projects when required.

Jarret Riley

Jarret commenced his career as an apprentice working predominantly in the residential sector delivering numerous high end full service electrical installations.

With a solid grounding, he then joined Brian at an established electrical company heavily involved in the commercial, retail and hospitality sectors, where he remained loyal for over 10 years.

Jarret’s meticulous attention to detail, customer service and commitment to quality workmanship was quickly recognised, culminating with the responsibility of managing and delivering the company’s most critical projects.

During his 10 years of industry experience Jarret has managed and delivered on numerous projects, such as TOPSHOP (Forrest Chase), The Emirates Lounge and Head Office (Perth International Airport) and the Colliers International Head Offices (Mill St Perth).

With the establishment of BLUEWIRE ELECTRICAL & DATA, Jarret and Brian have over 30 years of combined industry experience, thereby providing superior quality and cost effective electrical and data solutions for all your projects.

PROJECTS AND KEY CLIENTS

Splash City Water park - Belmont Racecourse
