# About Us...

Safety Aerials Australia was first established back in 1987 with the vision to supply quality products and offer the highest level of customer service.

All of our Safety Aerials are Australian Made and manufactured to the highest standard to ensure long lasting durability.

Our extensive range of quality product has enabled us to be awarded with supply contracts with major mining companies throughout the country.

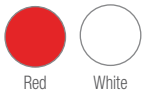

We have core values that focus on being the provider of first choice in our selected markets and on delivering better outcomes for our clients.
