Lock Cylinders

Access & Accountability at the turn of a Key

LOKtouch™ is a licensed product of the MLA,
and is supplied throughout Australia
and New Zealand by Master Locksmiths.

www.loktouch.com.au

LOKtouch is the future of Master-Keying. The LOKtouch system uses wireless, stand-alone cylinders powered by electronic keys. Easy-to-use software manages Client Sites by allocating users, assigning access permissions, and much more.

Keys

Date/Time Access Control

User Access Permissions can be set to allow access on certain days and at certain times, including holidays and weekends.

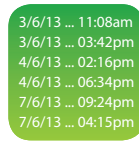

Key Features

- Smallest Electronic Key of its type.
- Hard wearing stainless steel tip.
- Sealed waterproof electronics.
- Battery life up to 50,000 openings.

Key Expiry

A lost or stolen Key's permissions will expire from the system. Also, it can be blacklisted in specific locks.

Audit Trail

Each Key stores the last 3000 access events, which are retrieved when the key is re-authorized.

Software

Modify User Permissions

User Access Permissions can be edited and updated as required.

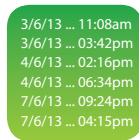

Maintenance Free

Delete & Create Users and Replace Lost or Stolen Keys via software.

Date/Time Access Control

Set Access Permissions for Users, based on daily or calendar requirements.

Full Audit Trail

View full Audit trails, which are automatically retrieved from the Key, or can be manually retrieved from the Lock.

Lock Cylinders

Easy Installation

Swap existing mechanical cylinders for LOKtouch electronic cylinders.

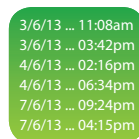

Compatibility

Compatible with all popular lock cylinders for Australia & NZ.

No Batteries

LOKtouch cylinders are powered by the Key, eliminating the need for batteries or wires.

Audit Trail

Each cylinder retains current access events.
