

Revolutionary Roof Coating Cools Your Home and Water-proofs Your Roof

If you'd like to cool your home, protect your house from storms, and give your roof a great new look, then Insultec insulation roof coating and water-proofing membrane is your solution

COOLS YOUR HOME BY A MASSIVE 15%

Using a unique formula that has been tested and proven to stop solar heat transfer, Insultec can reduce the heat inside your ceiling cavity by an amazing 47%. This transfers to an inside temperature reduction of up to 15%.

SLASH YOUR ELECTRICITY BILL

Insultec literally pays for itself in the savings you'll make by not having to run air-conditioners and fans any where near as much. This will save you literally thousands of dollars over the next few summers!

FIXES ROOF LEAKS

In many instances, Insultec acts as a water-proofing membrane. Where other repairs are required to fix leaks, we can do them too.

IMPROVE THE APPEARANCE OF YOUR HOME

Your roof makes up approximately one third or more of what you see when you look at your home. By having your roof painted with Insultec, you'll give your whole home a facelift.

CAN BE APPLIED TO ALL SURFACES

You can use Insultec on all types of roofs. Also, it can be applied to walls and other surfaces... any surface you'd like to cool!

WATER-PROOF YOUR ROOF

At Reliance Roof Restoration, we don't just paint your roof. If you like, you can have your roof fully repaired and restored. And because Insultec is a water-proofing membrane, you can protect your home for many years to come.

ENVIRONMENTALLY FRIENDLY

Insultec is completely safe with no harmful chemicals. And because it's compatible with potable water, you can even drink water off a roof coated with Insultec.

EXTENSIVE TESTS PROVE THAT IT WORKS

Countless tests both here and overseas prove the effectiveness of Insultec. One test carried out by the Indian Institute of Technology found that on a sunny day with an air temperature of 32 degrees, a metal roof coated with Insultec heated up to 34 degrees. An uncoated metal roof under the same conditions reached a staggering 74.4 degrees!

Here's What Others Are Saying About Insultec

"We were away for a week after the job was completed and we couldn't believe how cool the house was on our return"

J. Bowman

"It really works."

The outcome is far better than we ever expected"

J. Paltridge

"We are delightfully surprised with how well Insultec works."

It makes our conservatory liveable now"

F. Parker

"We are very happy with how well Insultec has worked on our patio roof."

We are telling everyone about your product"

R. Beecroft
