

A woman with dark, curly hair is relaxing in a white hot tub. She is smiling and looking towards the camera. Water is spraying from several jets in the tub, creating a dynamic and refreshing scene. The background is a plain, light color.

A LIFETIME
OF **RELAXATION**

 **HotSpring**[®]
Portable Spas

THE ABSOLUTE **BEST**
LIFETIME OWNERSHIP
EXPERIENCE

We understand that deciding who to buy from is as important as choosing the spa itself - because owning a spa means forming a long-term relationship with the manufacturer as well as your local dealer partner.

- As the manufacturer, HotSpring® honours that relationship by backing every spa with solid warranty protection, as well as the finest after-sale customer care.
- We provide ultimate peace of mind by delivering unparalleled service and support in partnership with the world's best independent dealers. There's one located near your home town and in over 800 locations worldwide.
- We are dedicated to ensuring that every HotSpring spa is built for the reality of daily use and delivers the benefits you want in the most efficient, convenient and reliable manner.
- Our commitment to advanced engineering and innovation makes HotSpring spas unsurpassed in functionality, energy-efficiency, and quality. From day in and day out dependability to the absolute lowest operating costs, you will discover that over time, your HotSpring spa delivers the best value.
- As the world's number one-selling brand, we are devoted to providing you the absolute best lifetime spa ownership experience possible.

ENVIRONMENTALLY AWARE WE THINK GREEN IN EVERYTHING WE DO

The Earth Smart™ Spa

We are committed to building the most environmentally friendly spas, with a minimal environmental footprint. Our Aria® model is supported by an ABS substructure made of recycled materials.

Think Green Manufacturing

As environmental stewards, we have made Green initiatives a part of our long-term corporate strategy, thinking Green in all aspects of our business.

HotSpring uses TÜV, Europe's leading independent scientific and engineering firm, to quantify the actual energy consumption of our spas. Our Saving Energy pamphlet explores these topics in much more detail. Ask your local HotSpring dealer for a copy.

SURROUND YOURSELF IN STYLE

Good looks and attention to detail are the hallmarks of every thoughtfully designed HotSpring® spa.

Traditional meets Modern

With clean lines and flowing curves, our spa design is a modern expression of the traditional. Eye-catching details include our stylised bartop, custom jet recesses, vibrant stainless steel jet trim, and contemporary diverters and air levers.

Defining Details

Our shells are beautiful and strong. The acrylic surface layer is co-laminated to an impact-resistant ABS substrate. These two layers are fused together in a controlled, automated process that ensures a more durable, even surface that will provide years of enjoyment.

We pioneered the development of alternative-wood cabinets. Our exclusive Everwood® cabinet delivers low maintenance and high durability, and comes with a five-year limited warranty. The embossed wood-grain look evokes the natural warmth and beauty of wood.

Ergonomically Designed Seating

Each seat in a HotSpring spa has been designed to maximise comfort and the benefits of hydromassage. Unlike typical acrylic/fibreglass shells, our spa shells are formed to follow the body's contours, providing gentle support. Our ergonomic designs allow for ideal jet placement that targets specific muscle groups. Multi-level seating accommodates adults and children of varying heights.

PASSIONATE ABOUT INNOVATION

Lighting by Design

With the Luminescence® four-zone multi-colour lighting system, you can individually control each zone – underwater, bartop, pillows and water features – to enjoy your favourite mix of colours.

If you prefer, simply illuminate just one zone. The system also includes a colour wheel sequencer that rotates through all six colours, and a dimmer setting for underwater lighting.

Moving Water

The sight and sound of running water is exceptionally calming, which is why innovative water features are included on selected models.

They can be enjoyed in “tranquility mode” or with the jets activated. The BellaFontana® water feature incorporates HydroOptics® technology to create three illuminated arcs of dancing water. The SoothingStream® water feature delivers a gentle blue river flow.

Listen, Watch and Enjoy

HotSpring® spas are designed entertainment-ready for easy speaker and system installation. You can add an optional HotSpring Moonlight™ entertainment system at any time!

Sensational Sound

Design your own symphony of sound with the wireless MP3 and iPod® cabinet mounted music system or amp up the band with the iCast™ transmitter technology from any audio source in your home directly to your spa - iPod, MP3, satellite radio, AM/FM audio, your stereo system or your computer. No matter what music system you choose, you will enjoy luxurious sound while relaxing or entertaining.

Wireless TV System

For maximum entertainment, add the excitement of a Wireless TV to the Wireless Sound System. Transmit your favorite show from your home TV wirelessly, whether it's cable, DVD, or satellite. There is no need to run cable to your spa or place a DVD player outside. The 43 cm widescreen LCD TV that attaches to your spa cabinet is waterproof and temperature resistant. It comes with a mounting bracket that rotates 350° so you can enjoy the TV from anywhere in your backyard.

In a HotSpring® spa, all water passes through the filters before it re-enters the spa, whether in filtration mode or during use when jets are on.

The **Silent Flo 5000®** pump - a dedicated, energy efficient, low-amp, silent pump - constantly draws water from the spa, runs it through the filter and the heater (heating only when necessary) and then back to the spa. No time-consuming programming is necessary; it works automatically.

For a more natural approach to water care, all HotSpring spas come standard with the **FreshWater® III** High Output Ozone System. This system continuously injects millions of tiny, highly concentrated ozone bubbles into the mixing chamber, neutralising contaminants on contact. Quietly and efficiently, your HotSpring spa is always hot, clean and ready to enjoy.

The **FreshWater® III** ozone system is a part of the **EverFresh®** water care system. A Continuous Silver Ion Purifier introduces silver ions into the spa water which inhibit the growth of bacteria. Augment the system by periodic inclusion of FreshWater Dichlor.

Unlike conventional surface filters, the patented **Tri-X® filters** work in three dimensions to produce clean, sparkling water. The filter has twice the cleaning capacity of a similar sized cartridge, and lasts years longer; HotSpring - unbeatable water clarity.

CRYSTAL CLEAR WATER

Tri-X® filters

FreshWater® III

QUARTET®

Stress and tension melt away as four Precision jets, located above each Moto-Massage DX jet, work like an extra set of hands to massage and relax your neck and shoulders.

SOOTHING SEVEN®

Each jet's seven nozzles broadcast a large volume of water and air. Positioned side by side, they provide gentle treatment to your shoulders and upper back.

HYDROMASSAGE

Powerful not punishing, this jet offers an interchangeable nozzle. Select the flow-enhanced directional nozzle for maximum performance, or the dualport rotary nozzle for a V-shaped, pulsating massage.

HYDROSTREAM®

HydroStream jets provide a strong flow of water and air that quickly soothes away tension.

PRECISION®

Focusing attention on your back, neck, calves and wrists, the Precision jet's directional and rotary nozzles perform like the fingers of a professional masseuse.

JET-CLUSTER™

For a full back massage, our exclusive Jet-Cluster hydromassage systems target specific muscle groups by directing various jets to work each part of the back.

FOOTSTREAM™

Aching lower back pain needs the extra power of a FootStream jet. An invigorating, directional whirlpool jet - far more powerful than a Hydromassage jet - offers fast relief.

FOOTWELL®

After a long day on your feet, nothing feels better than the invigorating jets of our FootWell system. While other spas typically use only standard hydromassage or mini-jets, the FootWell system uses the power of our FootStream jets to provide maximum-strength reflexology.

SENSATIONAL JETS

Your HotSpring® spa works just like the hands of an experienced masseur. All our jets are completely adjustable to create just the right sensation, from powerful and invigorating to gentle and soothing. By designing our own jets and optimising the plumbing system, we minimise restrictions in the water flow, enhancing the intensity of your massage.

MOTO-MASSAGE® DX HOTSPRING EXCLUSIVE

HotSpring revolutionised the spa industry with this innovative, moving jet. It is so comfortable, you will enjoy resting against it for an extended, invigorating massage. Imagine two warm streams of water sweeping up and down the entire length of your back, soothing overworked muscles and loosening all the little knots of tension.

HotSpring® spas have moved technical evolution up the scale from consumer programming to automated heating and cleaning cycles. All you have to do is decide what water temperature you like, then set it and forget it.

The HotSpring logo'd Power-On/Ready indicator light, located on the cabinet front, is visible even with the spa cover in place. You can confirm your spa is on and ready from a distance – a real advantage, especially in winter.

The revolutionary **No-Fault® Heater features** a chemically resistant Titanium element. We prove it with a 5 year unconditional heater warranty! Enjoy continuous warm, clean water as our separate **Silent Flo 5000® circulation pump** works efficiently and silently circulating water 24 hours a day. Since the water is filtered even when the jet pumps are on, you are ensured clean water during your soaking time.

The IQ2020® spa control system - the brains inside every HotSpring spa – uses advanced technology to make our spas simple to operate. Our control panel is accessible from inside or outside the spa, and is designed for ease of use so you'll have your HotSpring spa controls mastered in under a minute. The 9 cm, high resolution, colour LCD digital screen has large text that's easy to read, especially at night. The memory feature saves your favorite customised settings. We spend extra time engineering our products for simplicity, so you can spend extra time enjoying your spa.

The optional **IQ2020 Remote Control** communicates with the IQ 2020 system via two way radio frequency. It allows you to operate all electronic spa functions from anywhere within a 20-meter radius of the spa.

YOUR SPA IS ALWAYS READY WHEN YOU ARE

ABSOLUTELY ENERGY-EFFICIENT

YOU JUST CANNOT FIND A MORE ENERGY-EFFICIENT SPA

The Energy Smart® Spa

Energy Smart features on every HotSpring® spa make them exceptionally efficient so that you can enjoy low monthly operating costs. HotSpring spas are totally insulated with multiple layers of high density, polyurethane foam, the same material used to insulate commercial freezers. All HotSpring spas come with a deluxe custom-fit cover that has a high R-value and a dense foam core that forms a tight seal to maximise heat retention.

We Set the Standard

HotSpring has led the industry in the design, engineering, and manufacturing of energy-efficient spas. We received the German ENVY Award for energy-efficient spa design and the Flex Your Power Award from the State of California for energy-efficient manufacturing operations.

Our unique design reclaims air already heated from equipment operation and regenerates it back through jets. Unlike other spas, there are no cold air blowers to cool off your spa when in use.

HotSpring has been the leader in designing and manufacturing energy efficient spas. No other spa operates with the efficiency of HotSpring. Enjoy first class comfort for economy fare.

Sit back and relax...

Calculating Your Monthly Cost

How much will it cost to operate a Hot Spring spa? That depends on the model you own, the temperature you set, your frequency of use, the mean ambient temperature and the cost of electricity where you live. To get an idea, use the energy table below. It presents the actual documented energy consumption of a mid-sized Hot Spring spa in heavy use, based on rigorous testing conducted by Parkside Laboratories, an independent scientific testing laboratory.

Approximate Energy Consumption					
Country	City	Annual Mean Ambient Temperature (°C)	Average Energy Per Week To Operate the Spa (kWh)	Average Electricity Rate Charged (Cents per kWh)*	Approximate Weekly Energy Cost To Operate Spa (NZD or AUD)
AU	Brisbane	20.6	25.9	16.6c	\$4.30
AU	Cairns	24.8°	19.7	16.6c	\$2.80
AU	Melbourne	14.5°	34.9	16.5c	\$4.80
AU	Perth	18.2°	29.5	17.8c	\$5.30
AU	Sydney	17.7°	30.2	18.1c	\$4.20
NZ	Auckland	15.1°	34.1	15.6c	\$5.30
NZ	Christchurch	12.1°	38.5	17.4c	\$6.70
NZ	Dunedin	9.9°	40.1	16.5c	\$6.60
NZ	Wellington	12.8°	37.5	17.7c	\$6.70
NZ	Whangarei	15.5°	33.5	18.2c	\$6.10

*Based on a 240 volt Sovereign® spa set at 39°C used 6 times per week; 15 minutes with the jets on, 15 minutes with the jets off during each use. Testing conducted in a Controlled Environmental Chamber using continuous Data Acquisition monitoring equipment including Continuous Progression Kilowatt Recording meters, Voltage Measurement probes, Current Measurement Probes, Relative Humidity Chamber Measurement probes and Thermocouple probes. All equipment was rigorously calibrated to ensure data accuracy.

Based on rates by various electricity suppliers in November 2009. Excludes any daily line charges. kWh rounded to one decimal place, weekly cost rounded to nearest 5c.

Rates subject to change — check with your local electricity provider for the current rate in your area. Ask your dealer to view full test report.

CUSTOMISE YOUR HOTSPRING® SPA

The options are endless! Enjoy a built-in appearance with all the benefits of a HotSpring spa.

HotSpring Quality, Your Custom Design

When adding a spa to your backyard environment, the spa's appearance can be as important as the hot water therapy. Now you can enjoy the comfort and convenience of a self-contained spa as well as the beauty of a built-in custom look.

Our Custom Installation Guide provides information on recessing any HotSpring spa in a deck, patio or other hardscape element. The guide is available through your local HotSpring dealer.

Custom Cabinet Spa

Our Custom Cabinet (CC) spas are specifically designed to be surrounded by any style of exterior surface to blend with your outdoor environment.

Add a partial or full SpaStone® (S) surround in Earth or Gray to create the beauty of a natural-stone look. Or work with your landscape contractor to surround your Custom Cabinet spa with whatever material you desire.

SpaStone Partial Surround

The SpaStone partial surround offers a custom look, and features an integrated step that extends the length of the spa. The bottom of the surround is designed to harmoniously meet up with your deck or other surface to complete the built-in appearance.

SpaStone Full Surround

The SpaStone full surround brings the stone look to above-ground installations. Complete the SpaStone look with the addition of optional matching SpaStone steps.

Add the optional CoverCradle® cover lifter to a full surround spa, or the UpRite® cover lifter to a partial surround installation. After a nice relaxing soak, you will appreciate how easily your cover glides back in place.

VISTA™

Seating Capacity 6 adults

Dimensions (cm) 254 x 231 x 97 H

The Vista™ is our most fully-featured spa, with 47 jets and two 2.5 horsepower jet pumps. Its extremely comfortable lounge accommodates a wide range of heights, while its corner seats deliver a variety of targeted back, wrist and calf hydromassage options. The Vista™ includes the Moto-Massage® DX jet and the BellaFontana® water feature.

GRANDEE®

7 adults *Seating Capacity*

254 x 231 x 97 H *Dimensions (cm)*

The Grandee, with its expansive, Barrier-Free design, provides plenty of room for a party of seven.

Two Moto-Massage® DX jets let two people enjoy a terrific back massage at the same time.

The BellaFontana® water feature adds to the overall ambiance, with a tranquil waterfall.

ENVOY®

Seating Capacity 5 adults

Dimensions (cm) 236 x 226 x 91 H

The Envoy delivers outstanding performance with 39 jets, including the Moto-Massage® DX jet, and two 2.0 horsepower jet pumps. A comfortable lounge and a recliner seat with wrist and leg jets soothe and refresh. The three FootStream™ jets in the FootWell® system provide exceptional foot therapy. Advanced Tri-X® filters keep the water clear and fresh.

VANGUARD®

6 adults *Seating Capacity*

220 x 220 x 91 H *Dimensions (cm)*

The Vanguard, winner of a Consumers Digest Best Buy award, is extremely energy efficient. It features a Moto-Massage® DX and a Moto-Massage® jet, each complemented by a Quartet® jet system, to soothe your neck, shoulders and back. Its comfortable seating, styled armrests and SoothingStream™ water feature provide maximum relaxation.

SOVEREIGN®

Seating Capacity 6 adults

Dimensions (cm) 203 x 236 x 84 H

Roomy enough to treat you and five friends like royalty, the contemporary styling of the Sovereign makes a beautiful addition to anyone's castle. Its extra-long lounge, expansive Barrier-Free seating, extensive jet variety and SoothingStream™ water feature deliver a regal spa experience.

PRODIGY®

5 adults *Seating Capacity*

188 x 221 x 84 H *Dimensions (cm)*

A spacious five-person spa, the Prodigy features a variety of jet configurations in six seating locations. From the soft yet penetrating full back massage of ten Precision® jets, to the invigorating lower back massage of a powerful FootStream™ jet, a customised hydromassage experience awaits.

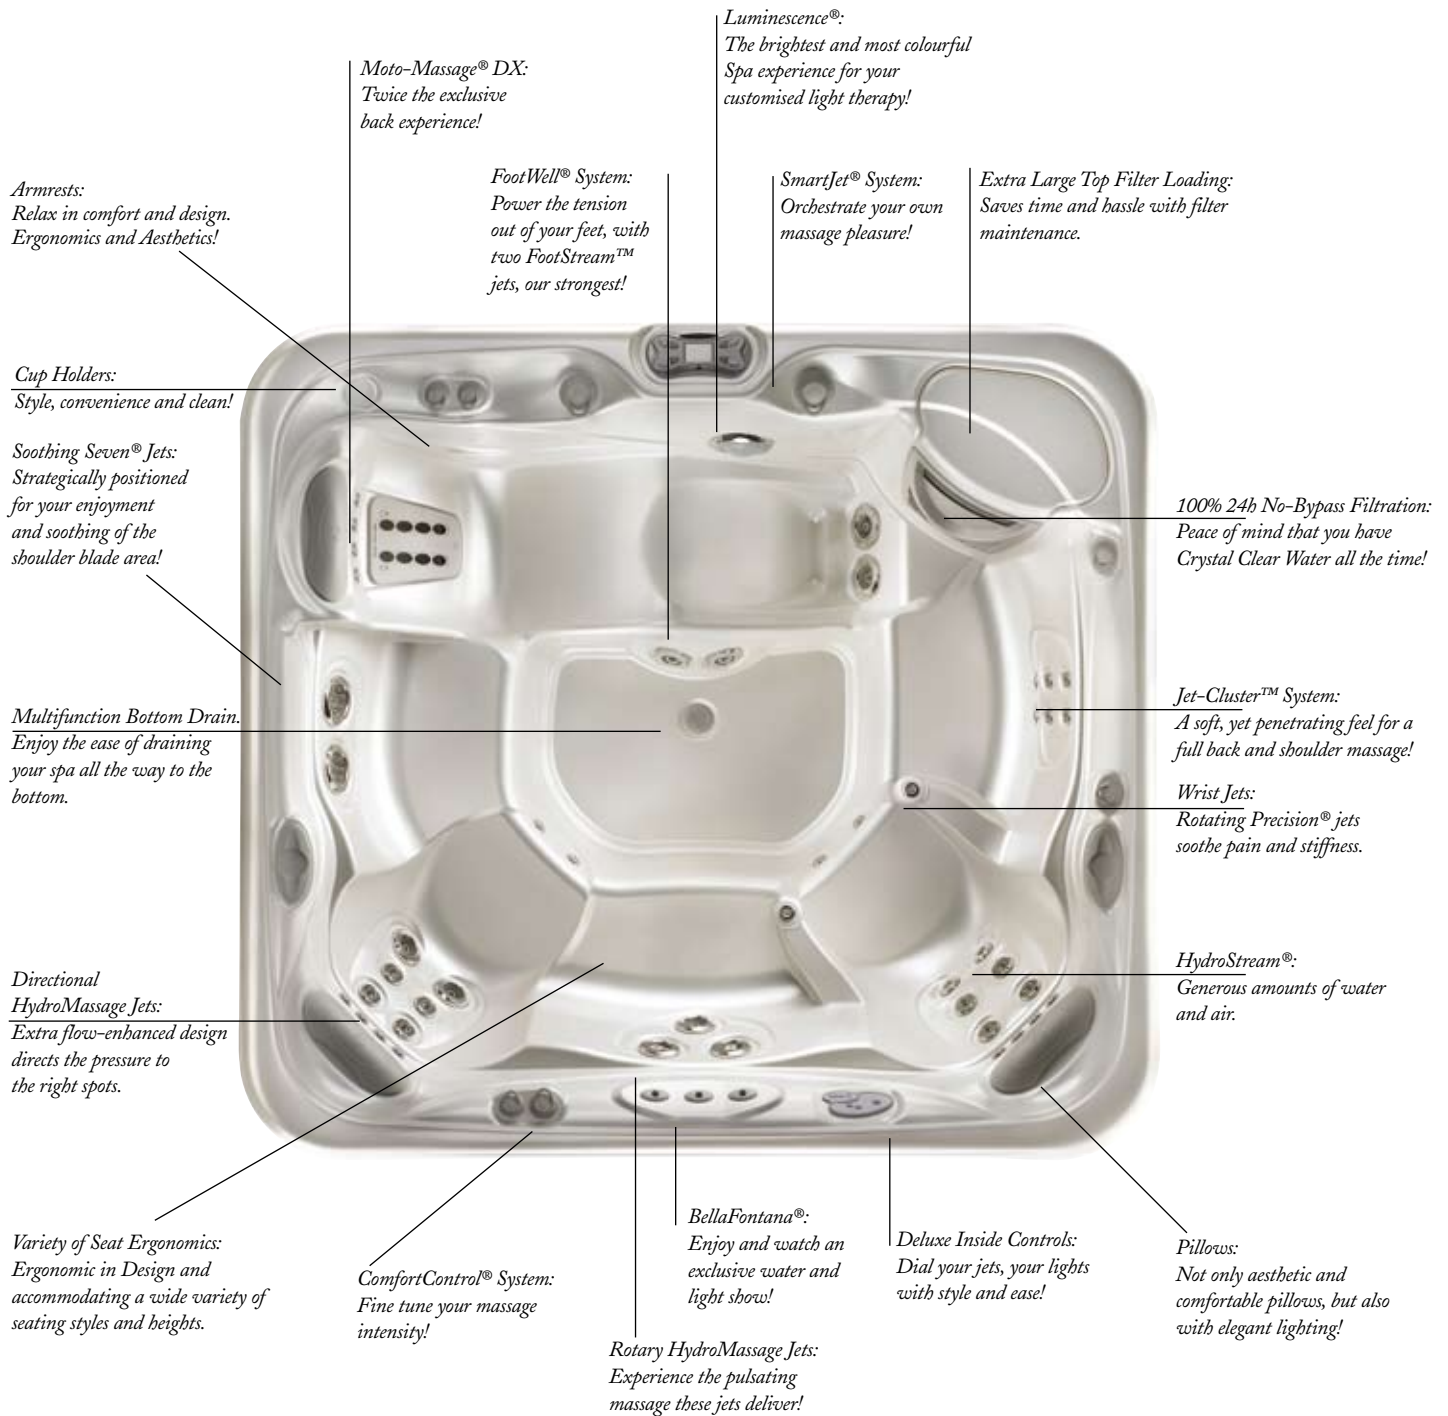

JETSETTER®

Seating Capacity 3 adults

Dimensions (cm) 213 x 165 x 74 H

The Jetsetter is perfect for one, two or three users. The lounge seat has a Moto-Massage® DX jet for your back, Precision® jets for your neck and shoulders and a FootStream™ jet for your feet so you can relax in style. The HydroStream® and Hydromassage jets provide additional hydromassage options.

A LIFETIME OF ENJOYMENT

Quality you can count on.

HotSpring® spas are known for quality. Our quality systems are certified to be in accordance with ISO 9001:2000 - the highest international standard for design and manufacturing excellence. What's more, our certification comes from Lloyd's, one of the most demanding and prestigious registrars in the world.

Furthermore, all HotSpring spas qualify under TÜV/GS and CE European Testing Standards for safety and reliability, and offer an international warranty that is designed specifically to ensure long-term protection.

It is no surprise that HotSpring is the most popular spa in over 68 countries throughout the world. Over 850,000 happy owners attest to that. You can enjoy a HotSpring spa wherever you live. Thanks to our world-wide network of more than 800 dealers and service centres with professionally trained personnel, there will be an expert nearby who can support you before, during and after the purchase. From the delivery onwards, HotSpring spas guarantee years of trouble free use. When you consider all the useful and pleasant advantages of owning a HotSpring spa combined with master design and manufacturing, you will find it is one of the best investments you can make in your personal pleasure and health.

HotSpring spas are the world's number one selling brand, and have been the market leader since 1977. They're made by Watkins Manufacturing, a company known for highest ethics and integrity. Watkins is one of Masco Corporation's family of companies whose products you trust in your home for quality and value - Hansgrohe® faucets, Hülpe® shower cabinets, and many more. HotSpring spas are also manufactured in New Zealand under licence to Watkins Manufacturing. They undergo further certification to ISO 9001:2000 and are tested independently for power consumption to local conditions. Ask your dealer to view test reports.
