

## **Why choose a Dental Prosthetist ?**

A Dental Prosthetist is specifically trained to construct, fit and maintain dentures. A referral is not necessary - By direct consultation, you and your Prosthetist have an opportunity to discuss aesthetic and function to enable denture design that will suit your individual situation. Your Prosthetist can also liaise with other practitioners & Dental Specialists to assist in a coordinated treatment plan if required.

Impressions Dental Studio uses the latest in technology and materials to assist you with your denture needs.

Using the latest techniques offers the personalised attention when constructing a correctly fitting denture - every mouth is unique.

Maybe you are considering Implant Retained Dentures, Full or Partial Dentures, or a Reline for maintenance - we can assist you in all aspects of your treatment.

To make an appointment for a free consultation - call us today

**Impressions Dental Studio 724 Plenty Rd. Reservoir East 94710933**
