

Standard Designs:

A standard design is one straight from the gallery. A full set of a standard design is the same design used on all 10 nails.

DIY Designs:

A DIY design is when you customise the standard designs from the gallery. You can customise the position, size, shape and colour of the design.

There are also big pictures in the gallery that you can crop bits from to create a small design for your nail. A full set of DIY designs can vary between 1 and 10 designs used on 10 nails.

Photo/Loaded Designs:

Take a photo with the machine's built in camera or load your own photo/design via USB or memory card. You can then customise your photo/design by reshaping, changing the colours, creating a frame and repositioning it on the nail.

A full set of photo/loaded designs can vary between 1 and 10 photos or designs you have loaded on to the machine used on 10 nails.

- The 1 and 5 nail option is for those who already have a base colour on their nails and would like a design on only a selected amount of nails, not a full set.
- The 1 and 5 nail option is also for those who like to experiment and would like a few photo designs and/or a few DIY designs and/or a few standard designs.
- The 1 and 5 nail option gives you endless possibilities.

NOTE:

We regret we do not offer any guarantee, as we are unable to control the degree of care and attention each individual will give to their nails.

We are not responsible for breaking, cracking, lifting, and infected nails.

No Exchange/Refund

STANDARD, DIY & PHOTO DESIGNS
ON YOUR NAILS IN ONLY 2-5 MINS

Quick Smart Nail Art uses innovative technology to print fine art designs and photos directly onto your own fingernails or artificial fingernail/toenail tips in just 2-5 minutes.

We provide a higher quality design than those painted by hand as we use digital technology that prints the exact design every time. You can choose from our gallery, which has thousands of designs, and change the colour, position, size and shape of the design you choose.

Quick Smart Nail Art even allows you to take photos with the in-built camera to create a design.

If you already have a photo/design you wish to use, you can load it onto the machine via USB or memory card and print it straight onto your natural/artificial nails.

You don't even need to access the machine, just email the photo/design to us and we can print it onto your choice of artificial nail and send it straight back to you.
