

GAS FITTING

Pure Plumbing Professionals can offer unique services that encompass gas work, gas leak detection, repairs and installation.

Gas heating

With our commitment to providing first class service for your home or commercial property, we can assist with gas heating to keep you warm during frosty winters.

Kitchen Appliances

Gas installations and repairs for kitchen appliances are no problem for Pure Plumbing Professionals. Our plumbers can provide oven change-overs and cook top replacements.

LP Gas

As licensed LPG gas fitters we take care of bottled gas at your home to connection of commercial spray booths. We test and commission marine craft such as boats and issue compliance certificates.

Hot water application

Gas fitting for hot water systems is a sustainable and more environmentally friendly option that ensures an endless supply of reliable hot water. We can connect gas to accommodate storage tanks, instantaneous heaters and continuous flow systems. Call our plumbers in Chatswood today to see just why customers come to us for top quality service and results.

Commercial Gas

If you have a commercial gas application that needs to be installed or repaired, we are the experts when it comes to, those larger gas requirements that need attending to.

Our services include:

- LPG installations
- Natural gas installations
- Gas leak detection and repairs
- Bayonet points
- LPG to natural gas conversion
- Gas meters
