

ARTWORK APPROVALS - EMAILS

Terms & Conditions

This form is part of your proof, attached to the same email as the proofs attachment.

PLEASE check this proof carefully for errors and omissions. Your "APPROVED FOR PRINT" emailed response constitutes acceptance of artwork in design and in content.

Spot Print Pty Ltd will not accept liability for errors overlooked at this stage of proofing. If you approve the information as correct, you will be financially responsible for the order.

We do our very best at meeting your specifications and deadlines however there is always the possibility that we could have made a mistake and getting the artwork right is an important step. Artwork cannot proceed with printing without a written or signed consent.

Please check for accuracy in the following areas:

Wording - Is it said correctly and punctuated properly?

Spelling - Is everything spelt correctly, Numbers, Names, Towns, Organisations?

Layout - Spacing, letter size, design aspect?

Size - Does the page size match your expectations?

Look - Is there anything else that doesn't appear right? Resolution and colours? Font types, case and size?

Do your changes now before you approve. If production has started and an error is found after the approval, additional charges will be incurred for any additional platemaking and productions.

If you do not understand the information in these terms and conditions, do not submit an approval until your questions have been answered with confidence.

Please either send us the required changes, or an "APPROVED FOR PRINT" response to this email including authorised persons name to approve and contact number.

to arrange your FREE measure & quote.

Ever felt disappointed with your new insulation?

Insulation does a great job of slowing the transfer of heat between the roof space and the living space in your home. On hot days heat can still build up, considering your roof can reach 70°C, it's a tough job for your insulation!

Installing a ventilator will help by expelling the trapped hot air from your roof which enables it to be replaced with the cooler air temperature from outside, hence a cooler home.

Your new ventilator will also:

- Expel the damp air in winter which causes condensation and mildew in your home
- Costs nothing to operate
- Helps your insulation work more effectively
- Reduces power bills which will save you money
- operates smoothly and silently

It is an inexpensive way to further improve your home.

*"Happy Home,
Happy Customer"*

We highly recommend the boys from Norwest Insulation. This last winter they insulated our home that we have been living I for 25 years. Immediately we noticed a difference in the room temperature and in fact we had to even turn the heater down by two settings. Our energy bills are remarkable lower than the same period last year. We just wish we had of done it years ago!
Mr. & Mrs. Garrick West Guildford NSW

Thank you for your professional, fast and efficient service! Since you improved our homes efficiency we have noticed it is much cooler now. Summer is here and we have also noticed the road noise has been reduced due to the acoustic property's of the insulation you left our home clean and tidy and we would recommend you to anybody. **Mr. & Mrs Sultana Kellyville NSW**
