

# IVF ACUPUNCTURE

## For Women

Many research studies conducted in Australia and overseas have shown that acupuncture combined with your IVF treatment can increase the chances of a successful pregnancy.

For best results, treatment after egg pickup and prior/post embryo transfer work well. Did you know that the egg you release for ovulation is affected by the nutrition your body receives 3–4 months prior to ovulation. Treatment 3–4 months prior to your IVF cycle may assist to improve egg quality.

## For Men

Acupuncture can improve the quality of your sperm motility, quantity, morphology. Some studies suggest the rate of fertilization is significantly higher by having treatment prior to IVF/ICSI
