Stylish & Practical Glass Enclosures

NOW you can enjoy extra living space with the revolutionary
SpaceSpan Glass Enclosure System

• Affordable • Streamlined • Secure

Choice of Style

A SpaceSpan Glass Enclosure has many options when it comes to style and practicality. Choose from a range of roofing options including fixed, pitched, atrium and opening roofs. Add your choice of ceiling panels such as modular, insulated or metal, all finished to tailor your roofing design to suit your individual needs, preferences and budget.

Superior Quality

SpaceSpan Glass Enclosures have many features complementing their unique engineering and construction quality. The streamlined SpaceSpan Windows and Sliding Doors, with our exclusive extruded aluminium architrave style mitred-- frames, guarantees the satisfaction of a superior external and internal appearance.

The Extruded Hollow Sashes provide high strength, eliminate warping and twisting and give an attractive appearance with beautifully styled radius edges. A high quality sealing system provides low air infiltration, which means improved energy efficiency, low maintenance and excellent acoustic results.

Economical Design

The exclusive Transom Rail for floor-to-ceiling windows ensures that no expensive verticals or drapes are damaged as the internally flush Transom Rail does not protrude into the room. With security a constant concern, SpaceSpan windows are also available with keyed alike locks.

Product range

- Face Fit Sliding Windows and Conventional Sliding Windows
