RHYTHM RUMBLE

**New music and
movement program
for 2-5 year olds**

BENEFITS OF MOVEMENT & MUSIC

It is so important to include music and movement in children's education as it has numerous benefits. Research has shown that children who regularly partake in music and movement strengthen their ability to learn mathematics and literacy.

When children actively participate in music it creates more neural connections within the brain. Research also indicates that children who experience music in their lives do better with cognitive, language and fine and gross motor skills.

Music will help develop your child in elements such as:

- Space (sharing and personal)
- Time (fast - slow)
- Force (tip toes – stomping)
- Flow (robot, flying)
- Rhythm (clapping, rhythm sticks)

ABOUT RHYTHM RUMBLE

Rhythm Rumble delivers an innovative edge for your children's future, involving a world of imagination, music and movement.

At Rhythm Rumble we would like to give all children the opportunity to express themselves in a creative and free spirited environment.

The Syllabus is designed for children to develop their skills progressively throughout the year. Also encourage their creative side by allowing them to improvise with musical instruments and their body. Exploring different styles of dance and music.

This program will bring many benefits to the children who are starting to explore their world. We would love to have Rhythm Rumble as part of your child's development.

*** We have classes on Mondays at Preston and Wednesday at Strathmore. Check out our website for more information**

WHAT RHYTHM RUMBLE OFFERS

- ⊙ Providing both dance and music education within the one class.
- ⊙ Adopting a syllabus-based program and using popular themes to explore music and dance and develop children in these fields.
- ⊙ Syllabus developed by experienced music and dance professionals.
- ⊙ Vast range of music used, from classical to commercial.
- ⊙ Strong focus on encouraging the inclusion of boys – adopting themes that are non-gender specific and stimulating for both boys and girls.
- ⊙ Improvisation is included in every class to encourage individuality and expression.
- ⊙ Changing the theme and syllabus on a three-weekly basis to provide a stimulating learning environment whilst allowing children to develop and progress within the theme
