Boulter Built Homes is a small volume high quality builder formed in 2004. We specialise in bespoke or individually designed homes of quality & durability in the greater Brisbane area down to northern New South Wales offering a complete design and building service to suit individual needs.

The foundation stone of any business is 'the people' behind the name and we firmly believe our subcontractors provide exceptional workmanship.

With over 20 year's experience in the building industry on projects ranging from high rise, office and shop fit out, renovations, pools, decks, traditional slab on ground through to pole homes (steel or timber) on difficult steep sites.

Our focus is to use our well rounded experience to offer a service to clients who require a home that is individual and does not fit the typical mould offered by a project home builder.

We are 'hands on' and are on-site or available at any time for the duration of the project. In our experience, this approach allows us to complete projects ahead of schedule with open lines of communication.

We pride ourselves on attention to detail and total commitment to client satisfaction.

Client Testimonial *"My neighbour's house was built by Boulter Built Homes and I was always impressed with the design and build quality. When it came time for us to build again, Boulter Built Homes was the clear choice. Our new home is finished to a high standard and we are pleased with the quality and finish. We made the right choice."* Chris & Sheeba

"Whatever good things we build end up building us."

Jim Rohn
