**Company  
Profile**

# Ramset™

"Ramset™ is a company with a proud heritage and exciting future."

# A Proud Heritage

In 1952, Siddons Drop Forgings Limited, a company founded by John Siddons secured the rights to the world's first commercially viable powder actuated fixing system.

The company Ramset™ Fasteners (Aust.) Pty Ltd was then formed, and destined to become a leader in developing, manufacturing and supplying the latest technology for the construction industry. Principal among this technology was concrete fixing, drilling and anchoring systems as well as construction chemicals.

Today, more than 50 years after being founded, Ramset™ is part of ITW, an international industrial corporation of over 875 companies, in 54 countries with 65,000 employees, and a turnover in 2008 of over \$US15.9 billion. Other leading ITW group construction companies in Australia and overseas include:

# Ramset™

Trade Focus has always been a way of life at Ramset™. No product is manufactured simply in the hope that it may be successful. Ramset™ personnel go out into the marketplace, onto construction sites, meet with engineers, ask questions, find out what really goes on, how trades operate and what customers require.

Armed with the knowledge gained from the field, Ramset™ engineers and technical service representatives are able to provide the highest quality products, technical expertise and service to customers.

While spending time on-site is second nature to Ramset™ personnel, customer support is also provided through our national Trade Centres and Customer Service Centre. The National Service Centre also provides full servicing facilities for the entire range of Ramset™ tools.

Ramset™ not only provides on-site sales and technical expertise, but also makes its products available to major trade distribution and retail hardware outlets around Australia. For trades people, this provides added convenience no matter where their job site is.

Training and operator instruction is available to the end user of Ramset™ tools and is an integral part of the relationship between the company and its distributors whose staff undertake comprehensive training to familiarise themselves with Ramset™ products.

Service, support, delivery and innovation all lead to customer satisfaction. It is a simple philosophy that permeates the business and has become the backbone in keeping Ramset™ at the forefront of the industry.

**"It's when you're on site that you really come to appreciate what the industry is all about."**

# Industry Icons

Cordless Powertools and AnkaScrews™

TrakMaster™

Many of the tools and anchoring systems developed by Ramset™ have become icons of the construction industry. In both Australia and New Zealand contractors and trades people will only use Ramset™ branded products.

Introduced over 35 years ago, the Sidchrome Rotary Hammer heralded the entry of Ramset™ into the concrete drilling field. By the late 1970's the tools became known as DynaDrill™ drilling machines, a brand that continues to be regarded as the leader in concrete drilling, chasing and demolition.

The DynaBolt™ Plus sleeve anchor was developed at the Victorian head office of Ramset™ and continues to be manufactured at the same site on dedicated production lines.

Among other iconic brands are the TruBolt™ all steel anchor, JobMaster™ general purpose low velocity powder actuated tool and ChemSet™ chemical anchoring systems.

Ramset™ is an icon of the Australian and New Zealand construction industries. Listed below are some of our best known trademarked products.

# Ramset™

Unlike any direct competitor, Ramset™ develops and manufactures a significant proportion of its product range in Australia, for the local, Asian, North American, Middle Eastern and European export markets.

A "dedicated" approach to product manufacture has simplified the process, from raw materials through production, quality control to packing and freight, which in turn has resulted in increased efficiencies, greater flexibility, the ability to adapt product to specific needs and higher levels of product reaching the customer "in-full, on-time".

Ramset™ is a "Quality Endorsed Company" and accredited to ISO9001:2008, Quality Management System - Requirements, which encompasses Research and Development, Manufacturing, Marketing, Sales as well as delivery of Products and Services to customers. Ramset™, Australian made ... quality assured.

# Innovation

Chemset™ Product Testing

Engineering Software

Throughout its history, Ramset™ has been at the forefront of innovation in the construction industry and today continues to meet these challenges through its ongoing investment in research and development, product testing facilities as well as its ability to call on the resources of other companies from within the ITW group around the world.

Examples of this include Pulsa™ gas technology which has revolutionized fixing to concrete and steel. Not only has this technology increased on-site speed but also reduced in place costs. Most recently this technology has been adapted to produce the InsulFast™GT tool and a range of fasteners designed to fasten insulation to concrete and steel.

The technology behind Ramset™ powder actuated tools has also continued to evolve with the introduction of the powerful FrameBoss™ fully automatic powder actuated fixing system designed and developed at the Victorian head office.

In the concrete anchoring field, the Australian developed, tested and manufactured ChemSet™ range is a leader in chemical anchoring of holding down bolts and reinforcing bars into concrete.

Innovation keeps Ramset™ at the leading edge of the industry.

# Ramset™

At Ramset™ our people are our strength. Their knowledge, commitment and talents drive our success. One of our key attributes is our people-focused culture. It is our belief that exceptional customer service can only be delivered by exceptional and motivated people - people who listen and are open to new ideas. The quality, enthusiasm and commitment of our employees are the cornerstone of our success.

Throughout Ramset™ you will find people with a wide variety of skills and backgrounds. People with diverse educational backgrounds, work experiences and personal interests. Our people are all united by something unique - a drive, a passion, a focus on personal development, a commitment to being part of a team and an appreciation that everybody can make a difference.

Whether you work for the company, are a distributor of Ramset™ product, an end user or supplier, you can appreciate the values that guide Ramset™ and its staff.

Innovative, efficient, entrepreneurial, outward looking and most importantly willing to work in partnership for the benefit of everyone. Ramset™ is a great company both within Australia and on the world stage.
