

Got Pests?

We provide a complete pest management service for all residential and commercial situations. Contact us for our complete pest treatment or a quote to manage pests at your commercial property.

Got Termites?

If you think you have termites or want the peace of mind an inspection will bring, contact us for an Inspection. We use the latest thermal imaging and moisture detection techniques and will recommend treatment options to suit your situation.

Termtrac thermal imaging

Termite Solutions retains the most advanced technology for thermal termite detection.

Thinking about buying a home?

Termite Solutions offers combined pre-purchase building and timber pest inspection services to Australian Standards. With experienced and qualified builders on staff our inspections are thorough and will save you time and money.

Prevention's better than Cure

- Get annual timber pest inspections and a preventative spray for peace of mind
- Keep sub floor areas clear, dry and ventilated
- Avoid building up soil, mulch and garden beds against your home
- Don't store timber or wood against the home

Solutions for Commercial and Residential Construction

Termite Solutions specialises in termite management systems for large scale commercial construction and residential properties.

- Termites do more damage to homes than fire and storm combined
- Termites are prevalent throughout Victoria
- More than half of 78 Victorian municipalities require a termite management system for new homes and extensions
- Termite Solutions can advise to suit your building type, location and needs

Our qualified and friendly staff are experienced in building and construction and can help ensure your biggest asset is protected.

Chemical Barriers

- Applied to the soil under and around your building
- Highly effective options for all building and construction types
- Deterrent and eradication options

Physical barriers

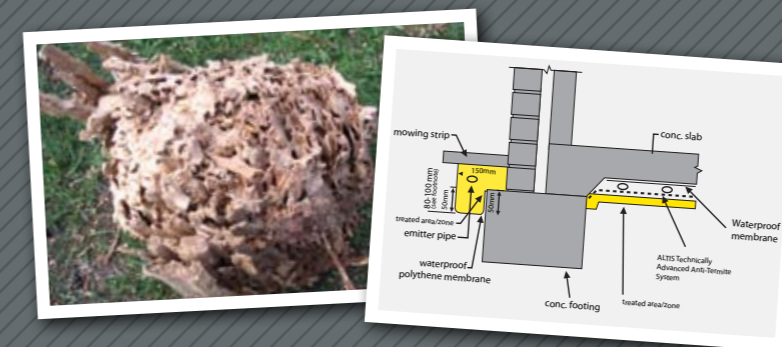

Lifetime protection with an annual inspection
Options include:

Chemical free barriers

- Termortar, Termi-mesh, Alterm, Granitguard
- Chemically impregnated plastic sheets
- Homeguard, Kordon

Pipe Penetration Collars

- Required on a concrete slab
- Installed prior to laying the slab

Reticulation Systems

- Reticulation pipe system
- Installed to building perimeter or under slab saturates the surrounding soil
- Replenished regularly for constant release of termite management agent
