

Windsor Optometry

Windsor Optometry is a family owned, independent practice with the same qualified staff greeting you at every visit.

Their success stands on three key points:

1. Top end clinical care:

They take the identification of eye diseases very seriously. To this end Deanne Bradford the Optometrist and business owner keeps her knowledge and management of ocular disease current. Deanne has very good relationships with local Doctors, Ophthalmologists and Pharmacists. Windsor Optometry has all the necessary equipment for a thorough eye examination including a digital retinal camera and visual field machine which aid in the detection and management of eye diseases like Glaucoma, Macula degeneration and cataracts.

2. Their loyalty is to their patients:

Windsor Optometry is loyal to their patients; not only corporate or franchise masters and are able to seek solutions for individual needs and lifestyle requirements.

3. High Quality Frames and Lenses:

Windsor Optometry has partnered with high quality frame and lens suppliers in Europe and Australia to ensure that their patients not only look good but can feel confident that they have bought eyewear that will last. Windsor Optometry has an onsite laboratory that supports our dispensing requirements ensuring your spectacles are supplied within a timely manner.

At Windsor Optometry they believe in the value of long term relationships anything less would be short sighted. The Staff always makes sure you feel welcome. Deanne gives you an unhurried eye examination and Melinda and Margaret will give you all the help you need in choosing frames and lenses to suit your lifestyle and budget.

They will also stay in contact with you after collection to ensure you are satisfied with your new glasses. They never cut corners.

At Windsor Optometry their long term vision is your long term vision.
