

## Skilled Migration Process

### Step 1

Decide the type of General Skilled Migration visa that is best suited to your current circumstances and needs. We do a very careful analysis on the applicant's academic and professional background and provide the best possible immigration solutions.

### Step 2

Have your skills assessed with the relevant Australian assessing authority. To find out the appropriate skill assessing authority for your nominated occupation, see [Qualifications and Assessment](#).

### Step 3

Lodge your visa application for state territory sponsorship if necessary. The state or territory Government will advise DIAC of your sponsorship or nomination. We represent your application for sponsorship with the state territory Government.

### Step 4

Depending on the type of skilled visa you are eligible to apply for, you may proceed with your application for the visa this time. We assist the preparation of your visa application and advice on the preparation of your required documentations. This time we represent your application in the DIAC for the visa. We also cater your need for adding additional family members and dependents in your visa application at the time of lodgment and often after lodging the application. Once a decision has been made on your visa, you can gain registration in your occupation (if required), move to Australia, find employment and settle in to your new life. For advice on settling in to life in Victoria, see [Find Settlement Help](#). Please note that we are not

employment consultant and hence are not in a position to offer employment.
