MKM Constructions is a well-established business which specialises in creating highly-productive commercial environments. We offer clients a full project management service from concept to completion. We also can partner with your chosen steel fabricator, engineer, designer, architect or consultant to ensure the project is successfully completed on time and on budget.

MKM takes a long term approach to its projects to ensure that the client can build a relationship directly with the builder. This in turn ensures that any issues that need resolving (such as extensions or alterations etc.) can be quickly organised between the separate parties. As word of mouth being almost our sole form of advertising, we strive to competitively satisfy every customer one by one.

#### Specialising in

- Commercial Construction
- General Construction
- Contract Building
- Project management
- Turn-key projects

#### Projects Include

- Warehouses
- Factories
- Precast Concrete Tilt up construction
- Large & Small Industrial Sheds
